Overview

Take turns dropping discs into the frame and try to connect four of your color before your opponent does.

Setting Up

1. Choose a level, stable surface with enough room for players to stand safely on either side.
2. Place the giant frame upright and attach the supports.
3. Check that the frame is steady before anyone plays.
4. Separate the discs by color.
5. Choose who goes first. Players then alternate turns.

How to play

1. Choose a disc in your color.
2. Stand to the side of the frame and select an open column.
3. Drop one disc into that column. Let it fall to the lowest available space.
4. Check the board for a line of four, then let the other player take a turn if there is no winner.
5. The player who makes the first line of four in a row wins! The winning line can be horizontal, vertical, or diagonal.

Important: Drop only one disc per turn. Do not push, move, or remove discs during play.

Safety Info

- ☐ Keep hands and feet clear when discs are released.
- ☐ Do not climb on the frame.
- ☐ Watch for uneven ground, wet surfaces, wind, and nearby obstacles during play.
- ☐ In the event of poor weather, please move the game indoors or under appropriate cover.
- ☐ Keep the play area tidy and return the discs and frame pieces after the event.
