Working Together Towards a Better Tomorrow!

Jessica O'Neal's Success through WIOA!

Jessica O'Neal came to CareerSource Pasco Hernando seeking additional tuition assistance for her Associates of Nursing program. She was self-enrolled at Galen College of Nursing, and was a self-pay customer, as she did not qualify for student loans/pell grant due to her previous education.

Jessica worked tirelessly at Moffit Cancer Center, all while attending school to be able to pay for her training. With WIOA assistance, Jessica was able to complete and finish her Associates degree, and has since relocated to Georgia. She is now currently working as a Registered Nurse.

She is very thankful for the assistance that WIOA provided as it allowed her to finish her goal, and work in her dream job!

Florida Prepares for Health Care Industry's Talent Needs

HERE ARE THE SKILLS AND PROFESSIONS MOST IN DEMAND

The health care and life sciences industry represents a major opportunity for Florida employers and career seekers at every level.

Florida is expected to [gain 6 million residents by 2030](#), which means the state must add 2 million jobs to remain at 5 percent unemployment. State leaders have identified health care and life sciences as a target industry with potential for high-wage jobs and overall economic impact, but the industry is evolving.

Technological advances, patient expectations and medical research have increased demand for specialized workers. [Career seekers](#) must also demonstrate proficiency in communication, customer service, organization and critical thinking.

CareerSource Pasco Hernando is leading the way in this landscape by anticipating the needs of both [employers](#) and employees.

As a starter for our discussion, here is a snapshot of the health care and life sciences industry and its talent demands based on the [Florida Jobs 2030](#) report by the Florida Chamber of Commerce.

The basics

The health care and life sciences industry represents 8.4 percent of Florida’s gross state product and about 810,000 jobs. The number of jobs is expected to grow by 9 percent through 2021.

Health care anchors this industry with the state’s 700+ hospitals and other health care facilities. The sector also includes medical device manufacturing, pharmaceutical manufacturing and biotechnology.

Educational demands

Of the state’s target industries, health care and life sciences has the highest number of occupations that require a postsecondary degree or credential (66 percent). Biotechnology, for example, is projected to grow by 25 percent in Florida with most of the increase in occupations that require a bachelor’s degree. Nurses with bachelor’s degrees also will be needed to serve the state’s large and aging population.

Entry-level and medium-level employees will be in demand in supporting roles as:

- Medical assistants,
- Medical secretaries,
- Billing and posting clerks and
- Medical records and health information technicians.

Within pharmaceutical and medical device manufacturing, there are expected opportunities for:

- Machinists,
- Industrial Machinery Mechanics,
- Dental laboratory assistants and

Identified gaps

The occupations with the highest projected gaps between supply and demand in the next eight years include:

- Physical therapists,
- Medical and clinical laboratory technologists,
- Billing and posting clerks,
- Health technologists and technicians and
- Dental hygienists

Note that the majority of the occupations are not in direct patient care roles.

Talent pipeline

One of the challenges in developing talent for the future will be encouraging more students to consider occupations in demand through career counseling and awareness. But companies also have opportunities to help current employees advance through [employer-led training and credentialing](#).

Internships, which benefit both the employer and career seeker, have long been a source of talent within the health care and life sciences industry.

Geography

Miami and Tampa have the largest number of jobs in health care and life sciences, but the areas with the greatest projected job growth over the next five years are: The Villages (24 percent), Ocala (15 percent) and Okeechobee (15 percent), with the retirement-age population driving much of the increase. The Gainesville area, meanwhile, is an identified growth locale for medical device companies.

With a wide range of jobs available, health care and life sciences will be an important industry within Florida for many years to come. At CareerSource Pasco Hernando, we stand ready to assist employers and career seekers.
