Working Together Towards a Better Tomorrow!

**CareerSource Pasco Hernando Youth Program
Success Story: Nyla Ketchum**

After Nyla received a flyer for the WIOA Youth Program from a CareerSource Pasco Hernando team member, she became interested in the possibilities available to her through the program. Nyla was specifically excited about receiving assistance with the Patient Care Tech Program, and attended the Develop U Employability Skills Workshop in August 2020. At this time, businesses were just re-opening after closing due to COVID-19.

The pandemic did not stop
Nyla from accomplishing her dreams!

She was able to gain employability and occupational skills, while social distancing. The Workshop offered by CareerSource Pasco Hernando helped Nyla gain the knowledge to obtain her first job!

September 2020, Nyla began her Patient Care Technician career pathway at Pasco Medical Training. However, due to unforeseen obstacles occurring, it took Nyla longer to complete the program than originally planned. But, it didn't deter her from successfully completing the program.

On April 1, 2021, Nyla received her first certification as a certified Phlebotomy Technician!

She didn't stop there!

In May, she received her Certified Nursing Assistance Certification, and then in June she became certified as an EKG Technician. Finally, in July 2020, Nyla successfully completed the entire Patient Care Technician Program, becoming fully certified!

Using the knowledge gained through the Develop U workshop and programs to become certified, Nyla successfully gained employment in August 2021 with Trinity Regional Rehab Center, as a Certified Nursing Assistant.

Nyla's next goal is to register at Pasco Hernando State College and enroll into the Licensed Practical Nursing program.

Congratulation, Nyla!
We are excited to see what you will accomplish next!

Upcoming Events

Live Online FREE Google Workshop

March 25, 2022
9:00am - 11:00am

***If you want to know more ways to
"Google It", this class is for you!***

Google Apps are a commonly used and a FREE option to Microsoft Office.

In this class, we will talk about Google Chrome, Google Mail and Google Calendar. We will also show you a brief overview of Google Drive, Docs, Sheets & Slides, as well as resume templates using Google Docs.

Come with your Google email address and password to get into your Google account. If you do not have that information, you can still follow along.

If you have your own laptop with MS Office 2016 or 2019 and Windows 10, you are welcome to use it during the workshop.

These workshops are for those familiar with basic computer skills.

**All workshops are now live online
and instructor-led via Zoom video conferencing.**

For those wishing for a hands on experience vs. presentation style, you will need a computer (Windows PC laptop or desktop), A second monitor (your smart TV will work), and a connection cable between your monitor and computer (unless you can Bluetooth them).

**If you need help getting connected and navigating multiple displays,
login at 8:30am to the Zoom meeting.**

The link to login will be emailed to you the day prior, and we will help you.

If you do not have the equipment, no worries, you can still watch along with us and learn lots of great things.

Class start time is promptly at 9:00am, and runs approximately 2 hours.

Please click on this link prior to your first online workshop for a brief tutorial on how to navigate Zoom live online video conferencing.

Florida Prepares for Health Care Industry's Talent Needs

HERE ARE THE SKILLS AND PROFESSIONS MOST IN DEMAND

The health care and life sciences industry represents a major opportunity for Florida employers and career seekers at every level.

Florida is expected to [gain 6 million residents by 2030](#), which means the state must add 2 million jobs to remain at 5 percent unemployment. State leaders have identified health care and life sciences as a target industry with potential for high-wage jobs and overall economic impact, but the industry is evolving.

Technological advances, patient expectations and medical research have increased demand for specialized workers. [Career seekers](#) must also demonstrate proficiency in communication, customer service, organization and critical thinking.

CareerSource Pasco Hernando is leading the way in this landscape by anticipating the needs of both [employers](#) and employees.

As a starter for our discussion, here is a snapshot of the health care and life sciences industry and its talent demands based on the [Florida Jobs 2030](#) report by the Florida Chamber of Commerce.

[The basics](#)

The health care and life sciences industry represents 8.4 percent of Florida’s gross state product and about 810,000 jobs. The number of jobs is expected to grow by 9 percent through 2021.

Health care anchors this industry with the state’s 700+ hospitals and other health care facilities. The sector also includes medical device manufacturing, pharmaceutical manufacturing and biotechnology.

[Educational demands](#)

Of the state’s target industries, health care and life sciences has the highest number of occupations that require a postsecondary degree or credential (66 percent). Biotechnology, for example, is projected to grow by 25 percent in Florida with most of the increase in occupations that require a bachelor’s degree. Nurses with bachelor’s degrees also will be needed to serve the state’s large and aging population.

- Entry-level and medium-level employees will be in demand in supporting roles as:
- Medical assistants,
 - Medical secretaries,
 - Billing and posting clerks and
 - Medical records and health information technicians.

- Within pharmaceutical and medical device manufacturing, there are expected opportunities for:
- Machinists,
 - Industrial Machinery Mechanics,
 - Dental laboratory assistants and

[Identified gaps](#)

- The occupations with the highest projected gaps between supply and demand in the next eight years include:
- Physical therapists,
 - Medical and clinical laboratory technologists,
 - Billing and posting clerks,
 - Health technologists and technicians and
 - Dental hygienists

Note that the majority of the occupations are not in direct patient care roles.

[Talent pipeline](#)

One of the challenges in developing talent for the future will be encouraging more students to consider occupations in demand through career counseling and awareness. But companies also have opportunities to help current employees advance through [employer-led training and credentialing](#).

[Internships](#), which benefit both the employer and career seeker, have long been a source of talent within the health care and life sciences industry.

[Geography](#)

Miami and Tampa have the largest number of jobs in health care and life sciences, but the areas with the greatest projected job growth over the next five years are: The Villages (24 percent), Ocala (15 percent) and Okeechobee (15 percent), with the retirement-age population driving much of the increase. The Gainesville area, meanwhile, is an identified growth locale for medical device companies.

With a wide range of jobs available, health care and life sciences will be an important industry within Florida for many years to come. At CareerSource Pasco Hernando, we stand ready to assist employers and career seekers.
