

CoolSaver Technician

Company: AO Cooling & Heating LLC

Location: Greater Houston Area (Mobile)

Job Type: Full-Time / Cool Saver Technician

Pay : _____ **Bonus :** Y or N

Position Overview

The CoolSaver Technician performs comprehensive HVAC tune-ups and performance diagnostics on residential and commercial air conditioning and heat pump systems. This role focuses on improving system efficiency through cleaning, airflow verification, refrigerant performance testing, and proper documentation of system performance. Technicians will follow the CoolSaver protocol, which emphasizes proper airflow, refrigerant charge verification, and detailed system performance reporting.

CoolSaver Technician Responsibilities

- Perform high-performance HVAC tune-ups (CoolSaver standards).
- Clean coils and blower wheels; document with photos.
- Test and adjust airflow and refrigerant (superheat/subcooling).
- Upload job data and submit project info via digital tools/CoolSaver platform in real-time.
- Obtain customer authorization and on-site signatures.
- Explain findings, recommend repairs, and maintain professionalism.
- Maintain a clean driving record

Required Qualifications

- EPA Universal Certification.
- Valid driver's license.
- Proficient with HVAC diagnostics and digital reporting.
- Knowledgeable in airflow, refrigeration cycle, and system performance testing.
- Must attend company training and safety meetings.
- Must utilize personal vehicle; company vehicle eligibility contingent upon proven reliability and commitment.
