

New Construction HVAC Technician

Company: AO Cooling & Heating LLC

Location: Greater Houston Area and Surrounding Counties

Job Type: Full-Time

Job Description:

AO Cooling & Heating LLC is seeking a skilled and dependable New Construction HVAC Technician to install HVAC systems in new construction residential projects. This role requires attention to detail, the ability to work from plans, and a commitment to quality workmanship and safety.

ESSENTIAL DUTIES AND RESPONSIBILITIES

- Read and interpret blueprints, plans, and job specifications for HVAC system installations.
- Install heating, ventilation, and air conditioning systems in new residential new construction projects.
- Install ductwork systems, including flex, rigid, and sheet metal duct.
- Set and install equipment such as furnaces, air handlers, condensers, and ventilation components.
- Install bath fans, over-the-range fans, and associated materials and components.
- Ensure all installations meet local, state, and mechanical code requirements.
- Work safely with tools, materials, and equipment, including handling refrigerants and compressed gases.
- Complete job documentation, reports, and required paperwork accurately and in a timely manner.

EDUCATION AND/OR EXPERIENCE:

- High school diploma, GED, or equivalent required
- Minimum 0–2 years HVAC installation experience (new construction preferred)
- Experience with ductwork installation and system layout strongly preferred

OTHER SKILLS AND ABILITIES:

- Basic knowledge of HVAC installation practices and tools
- Ability to work independently and as part of a team
- Willingness to learn and improve technical skills
- Basic familiarity with mobile apps or digital job reporting tools is a plus

CERTIFICATES, LICENSES, REGISTRATIONS:

- Valid driver's license required
- EPA Certification preferred (or willingness to obtain)
- TDLR Registered HVAC Technician (or willingness to obtain)
