

## Weighing Equipment and Solutions

### New Equipment Sales

- Analytical, micro balances, food-grade, counting, wheel pads, floor scales, etc.
- Mass/weights, testing and calibration-grade
- Load cells/transducers/force gauges, compression and tension measurement.

### Scale and Balance Calibration

- Ranging from 0.0001mg to 10,000kg
- All makes and models
- 6-point linearity check
- 4-point eccentricity check
- Sticker application
- Regularly scheduled intervals
- 17025 Compliance

### Weights/Mass Calibration

- Mass laboratory located in North San Diego County
- NIST traceable
- Calibration of ASTM, OIML, and NIST Class weights
- Use of high-precision mass comparators
- Free pickup and delivery in Southern California
- 3 - 5 day turnaround time (typical)
- Certificate of Mass Accuracy
- Sticker application

### Force Measurement Calibration

- Tension and compression gauges
- Load cells, dynamometers and torque testers
- Custom force testing solutions
- Traceable certification

### Portable Vehicle/Aircraft Weighing Calibration

- All makes and models
- 6-point linearity check
- 4-point corner-load check
- Sticker application
- Regularly scheduled intervals
- 17025 Compliance

### Repair

- Onsite service call for quick turnaround
- In house repair department
- Authorized repair center
- Pick up and delivery at no additional cost
- Minimal downtime

## Why Choose Us?

- ISO/IEC 17025:2017 Compliant Services
- On-site and in-lab calibration options
- Certified field technicians
- Custom solutions for unique weighing needs

## Industries Served

- Manufacturing and Industrial
- Transportation and Logistics
- Agriculture and Grain
- Laboratory and Pharmaceutical
- Geotechnical and Construction
- Food Processing and Packaging
