FASTPRO
BAGS AND TEXTILES

CHEMICAL MANUFACTURING SOLUTIONS

Safety and Strength for Chemical Handling.

In the demanding world of Chemical Manufacturing, safety, reliability, and performance are non-negotiable. Our complete line of FIBC UN Certified, Baffle, Type B, Type C, Type D, and Dewatering Bulk Bags is engineered to deliver maximum protection, handling efficiency, and product integrity in every stage of your process.

Designed for both non-hazardous and combustible powders, sensitive chemicals, and moisture-critical materials, our bags provide the highest levels of static control, containment, and durability. With strict compliance to international quality standards and rigorous testing, our FIBC solutions offer the consistency and safety your operations require.

LEGACY4™

THE BAG THAT BUILT THE INDUSTRY

Our FIBC Type B, C, and D bags are engineered for the demanding conditions of the Chemical Manufacturing industry, offering superior strength, safety, and reliability. Built to handle abrasive, high-density materials and tested to meet international quality standards, they ensure safer operations, efficient material handling, and long-term durability.

By choosing our products, companies gain dependable performance that protects their materials, their workforce, and their productivity.

LEGACY4™

THE BAG THAT BUILT THE INDUSTRY

Heavy-duty FIBC container.
Tailored to your needs and
requirements. For any kind
of industry.

- Capacity: Up to 4,000 lbs
- Fabric Coated
- Treated with UV stabilizers
- Fabrics: Type B, Type C and Type D (CROHMIQ®)

Our **Type C** (Conductive) and **Type D** (CROHMIQ® Fabric) FIBCs are designed to provide effective static protection in environments where static discharge can pose a risk.

	Type B	Type C	Type D
Electrostatic Protection	Prevents brush discharges	Fully conductive	Static-dissipative fabric
Grounding Required	No	Yes (mandatory)	No
Use in Flammable Atmospheres	Not recommended	Yes (when grounded)	Yes
Typical Applications	Dry, non-flammable products	Flammable & hazardous materials	Hazardous areas without grounding

CROHMIQ™
Static Protective FIBC Fabrics

CROHMIQ®, static-protective bulk bags have been around since 1995, marking over 30 years of commercial use in hazardous industrial environment.

Are you dealing with:

- Ruptures and material loss?
- Electrostatic ignition risks?
- Deformation and unstable stacking?
- Leakage of fine powders?
- Short lifespan in harsh environments?

FAST PRO BAGS AND TEXTILES
is your solution!

Our construction can be custom-tailored to your specific volume requirements and footprint, maximizing storage efficiency and integration with existing equipment or facility layouts.

FASTPRO
BAGS AND TEXTILES

LEGACY BAFFLE™

THE BAG THAT MAXIMIZED SPACE AND STABILITY

The Legacy Baffle™ is a high-performance 4 panel FIBC engineered with internal baffles to maintain a more stable, square shape.

- **Volume:** 20 - 130 Cu. Ft.
- **Load Capacity:** Up to 2,700 lbs.
- **Static Control:** Type C / Type D

Designed for efficient storage, transportation, filling, and discharge, the Legacy Baffle™ helps manufacturers make better use of warehouse and shipping space while maintaining the strength and flexibility expected from a high-quality FIBC.

WHY LEGACY BAFFLE™?

MORE USABLE VOLUME

Up to 25–30% more usable volume than standard bulk bags of the same height.

SPACE-EFFICIENT DESIGN

Maximizes warehouse, pallet, truck, and container space while reducing wasted space.

STABLE & STACKABLE

Maintains a uniform shape for improved stability during storage and handling.

BUILT FOR HANDLING

Cross-corner lift loops provide convenient forklift access.

Our four-panel construction can be custom-tailored to your specific volume requirements and footprint, maximizing storage efficiency and integration with existing equipment or facility layouts.

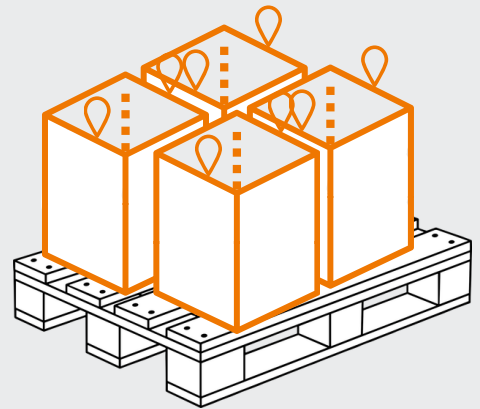

DRUM SACK™

THE SMARTER WAY TO STORE MORE

Strong, stackable, and space-saving, the smarter bulk bag for dry material storage and transport.

- Capacity: 600 lbs
- 5 Cubic Feet
- 30 Gallons

The **Drum Sack** offers a smart, durable, and space-efficient way to store and transport, combining the strength of traditional drums with a lighter, flexible design that fits four units per standard pallet.

Drum Sack Solutions:

- ✓ Reduce shipping and storage costs
- ✓ Optimize warehouse space
- ✓ Simplify material handling
- ✓ Eliminate unnecessary packaging weight
- ✓ Increase efficiency without compromising strength

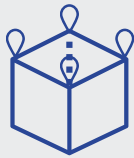

Our two-panel construction can be custom-tailored to your specific volume requirements and footprint, maximizing storage efficiency and integration with existing equipment or facility layouts.

TRASH-TON™ CONTAINERS

WHEN WASTE DEMANDS SERIOUS STRENGTH

FIBC for safe waste collection and transport. Durable, supports liners and closure options to prevent spills on floors and in maintenance areas. With stiffeners inserted between panels to provide rigid walls and supply stackability.

Our four-panel construction can be custom-tailored to your specific volume and capacity requirements. (restrictions may apply)

Are you dealing with:

- **Spills and Leaks:** Caused by weak fabrics, poor seams, and lack of liners or closures
- **Bag Collapse and Unsafe Stacking:** Weak construction can lead to dropped loads and worker injuries
- **Regulatory Non-Compliance:** From non-certified materials and manufacturing processes
- **Static and Ignition Risks:** When bags lack conductive or dissipative fabric options
- **Premature Wear and Failure:** From low-quality materials and no UV protection

The **Trash-Ton Container™** prevent leaks with durable liners and secure closures, feature rigid, stackable walls for safe handling, are UN-certified and made from 100% virgin PP, offer conductive or dissipative static-control options, and deliver long-lasting, UV-stabilized performance indoors and outdoors across industrial, pharma, and food-grade applications.

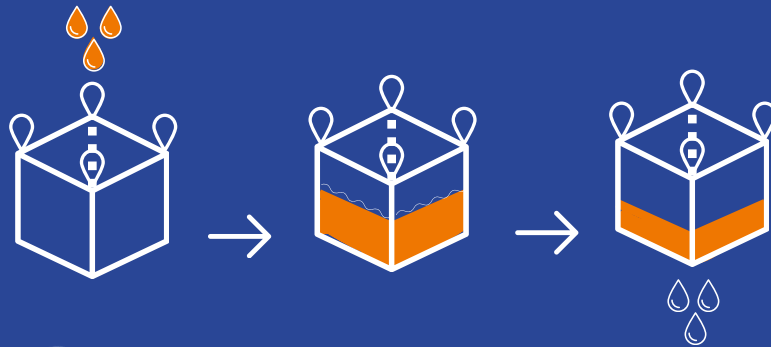

FILTRAPRO™

DEWATERING SYSTEM BAG

High-flow dewatering FIBC engineered to separate **liquids from solids.**

- High-flow uncoated fabric for efficient drainage
- Up to 3,000 lb capacity
- Customizable size
- Designed for multiple uses

Are you dealing with:

- **Slow drainage** that creates production bottlenecks?
- **Single-use solutions** that drive up costs?
- **Inefficient filtration** that complicates disposal?

FAST PRO BAGS AND TEXTILES
is your solution!

Our four-panel construction can be custom-tailored to your specific volume requirements and footprint, maximizing storage efficiency and integration with existing equipment or facility layouts.
