

IV a

Team

The team is comprised of Steven Jacobs CEO and Claudio Tassi CSO and Founder.

Design engineering and FDA certification will be contracted to professional outside firms. We have selected three firms for final discussions once funded.

Manufacturing is available at two of the engineering firms. We will evaluate multiple manufacturing companies after design details are available. We are able to source manufacturing in the US, Mexico and China.

Marketing will be contracted to professional marketing companies. As the sales grow we will add to internal staff for marketing but expect outside firms to still play a role in our marketing programs.

Sales team building will begin immediately after FDA certification. Focus will be on a sales team that presents to aged living locations and phone support and sales.

Initial back office functions will be contracted with in-house team build as the sales and needs grow.
