

CORA ai - The intelligent interface for care data

CORA connects existing systems and makes care data accessible
- regardless of where it is stored.

THE CHALLENGE

Nursing data is stored in different systems - with different structures and content

- Stand-alone solutions and media disruptions
- Time-consuming search in different systems
- High administrative effort
- Less time for actual care

THE SOLUTION

CORA ai is superimposed on the existing systems and accesses all relevant data with ai - regardless of structure and content.

Unified, intuitive access to all care data

THE ADVANTAGES

Nursing data is stored in different systems - with different structures and content

Time savings

Search less, find more - more time for people.

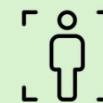

Efficiency

Processes are simplified, duplication is reduced.

Cost savings

Less effort, lower costs.

Focus

Less administration, more care and support.

CORA ai connects systems. Unifies data. Creates time.
For care that concentrates on the essentials: people.
