# American Patio Covers

Built with a reputation of quality products and superior customer service, American Patio Covers has been providing fully customizable aluminum framed and acrylic roof patio cover systems throughout the PNW for over three decades.

APC systems are custom-built to fit single-story, multi-story, and pre-existing structures. Each of our systems are built to fit your unique project.

Our framework is an extruded aluminum which provides durability, strength, and stability.

American Patio Covers utilizes Acrylite<sup>®</sup>, the most weatherable polymer on the market. Our covers are designed to block harmful UV rays, withstand driving rain, howling winds, and snowfall.

American Patio Covers are the perfect addition to any backyard at an affordable price.

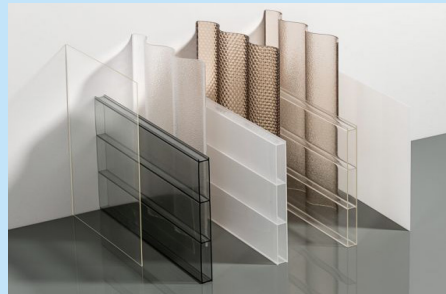

# APC Railing

American Patio Covers utilizes an aluminum frame and supplies a wide variety of aluminum railing profiles, pickets, and cable options.

AVAILABLE IN THE FOLLOWING COLORS:

## Aluminum

## Acrylic

Acrylic	Wave
