COMPANY OVERVIEW

Rose Valley Steelworks has established a formidable reputation for quality, exceptional service and expertise in custom steel fabrication.

Backed by state-of-the-art CNC equipment, we have branched out from our base in Armidale and Tamworth to cater to larger-scale projects across the eastern seaboard in industries such as mining, renewable energy infrastructure, government departments, construction and oil/gas structural work.

We pride ourselves on precision craftsmanship, innovative thinking and flexibility, with our customised fabrication shop equipped to undertake the most challenging of projects. Our team has grown to nearly 20 highly skilled steel and metal experts, with an exceptional record established over two decades of supplying durable, top-shelf feed and structural needs to the regional agriculture sector.

At Rose Valley Steelworks, our commitment to exceptional quality, customer service, innovation and consistently high performance across the full spectrum of steel fabrication has become our trademark.

OUR PURPOSE

State-of-the-art technology backs our guarantee of efficiency, innovation and quality, making no job too challenging.

The team at Rose Valley Steelworks has a genuine care for consistent quality and satisfaction of customers. Regardless of scale or complexity, we are with you – from planning stage, through to timely delivery, installation and maintenance.

Consultation and clear communication allow us to adapt to individual project requirements. Professionalism, consistency and reliability are as important to us as adding value.

We pride ourselves on establishing a connection with our clients, bringing a consistent focus on customer service to foster ongoing partnerships.

OUR SERVICES

We offer a full range of fabrication services, including structural steel design, alloy, stainless, sheet metal, as well as parts, modification and repair. From design to delivery and installation, we keep you fully informed as we create quality steel products for your large or smaller-scale projects.

The latest CNC machinery in the form of press-brake guillotine and plasma cutters complement Rose Valley Steelworks' renowned workmanship and reputation for efficiency and reliability.

We are experts in precision steel processing and the complex and demanding processes required, with our steel work durable yet stylish. Known for exceptional fabrication and services in the agricultural sector, we are fast gaining a reputation for the same high quality in the commercial, industrial and government sectors.

Our full metal shop service is complemented by a team specialised in complex skills for stainless and structural steel fabrication across industrial and construction projects.

SHEET METAL

Our CNC press technology is used for sheet metal and plate-processing guillotines, and folds from .55 to 6mm, resulting in durable, built-to-spec and ready-to-use premium parts.

PROFILE CUTTING

Regardless of shape, size or complexity, our CNC plasma cutters produce quality products across all plate and sheet metal requirements, including tubular and other complex needs.

FABRICATION

Across the spectrum and complexity of stainless and structural steel fabrication and welding, our specialised expertise and commitment to excellence is backed by CNC plasma cutting machining.

INDUSTRIES WE SERVE

From a proud history of serving the agricultural sector, Rose Valley Steelworks has grown to cater to national parks, government and industry departments with infrastructure such as building, bridges and ramps.

Our commercial and government services include durable, exceptional quality structures such as viewing platforms, building structures, access ramps and balustrades.

- Government departments
- National parks
- Fisheries
- Mining
- Renewable sector
- Commercial builders
- Disability sector
- Construction
- Oil and gas
- Retail

ACCREDITATION + EXPERTISE

Our hard-working, highly skilled team is headed by managing director Phil Macfarlane, who brings to the table 30 years' experience in construction and working with steel.

Rose Valley Steelworks prides itself on the strength, size and commitment of our team, boasting expertise and passion for commercial and industrial metal fabrication. We deliver quality workmanship across many styles of metalwork.

- Broad range of metalwork experience
- Structural steel design
- Full metal-shop service
- Alloy, mild and stainless steel
- Innovative, flexible approach
- Stringent safety/quality standards

Our expertise is backed by technology and innovation, delivering solutions from designing to finishing. You can rely on us to deliver the results you need – whatever the project or industry.

OUR CLIENTS

Rose Valley Steelworks has long had a peerless reputation across the agricultural sector in northern NSW, but has quickly expanded its footprint in regional and metropolitan regions across the eastern seaboard.

Our proven high levels of craftsmanship and durability are now on show through such projects as structural steel viewing platforms at national parks, and similar infrastructure for larger-scale government department (primary industries/fisheries) projects.

We have partnered with commercial builders such as Richard Crookes and O'Donnell & Hanlon, and our regional and metropolitan fabrication capability ranges from key infrastructure through to commercial stainless-steel kitchens.
