Commercial Solar via a Power Purchase Agreement (PPA) or Capital Expenditure (CapEx)

Efficient Options to Embrace Renewable Energy

Benefits of Solar Through a PPA

Zero Capital Outlay

All system design, equipment, and installation costs are covered. You invest nothing upfront.

Immediate, Ongoing Savings

Electricity through a PPA is typically 10 - 40% cheaper than grid-supplied energy. Savings start on day one and grow over time.

Predictable Energy Costs

Avoid market volatility. With a fixed or capped rate, you'll know exactly what you're paying - ideal for budgeting.

ESG and Sustainability Alignment

Meet CSR, SECR, and net-zero goals without financial strain. Improve tender success and reputation.

No Maintenance or Performance Risk

We monitor and maintain the system for you. If it underperforms, we carry the risk - not you.

Energy Independence

Generate your own clean power on-site and reduce exposure to future supply and pricing issues.

Benefits of a CapEx Model

Customer pays upfront and owns the solar system

Full access to SEG (Smart Export Guarantee) revenue

Ideal for: Companies with reserves or green finance, focused on long-term savings and asset value

Eligible for UK tax relief
(e.g. Annual Investment Allowance, Super-Deduction - if still applicable).

No roof size restriction
Ideal for SMEs or rural buildings.
