

WIRE SPINNER

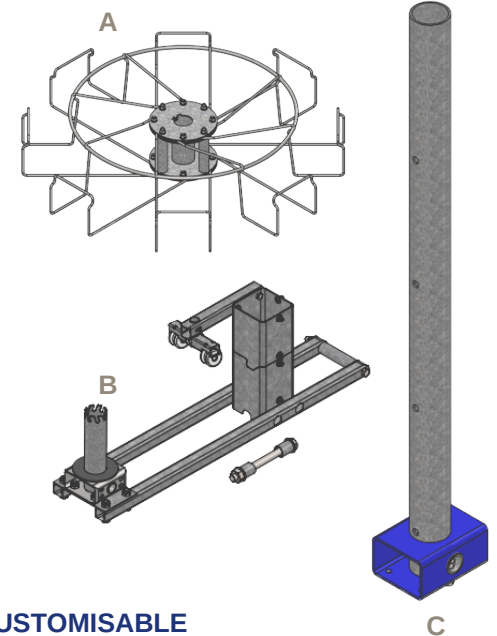

Walk the fence line once

Introducing the Wire Spinner Stacker

7. COMPATIBLE WITH WIRE SPINNER

6. CUSTOMISABLE

Wire Spinner Features:

2. WIRE GUIDE

- Overrun wire is removed from Spinner and unused wire feeds back onto spinner
- No jamming

3. WIRE CRADLE

- Made from Spring Steel for strength
- Load from top for easy wire removal and installation

3. THRUST BEARING

- Bearing reduces friction to allow for smoother spinning

Make wire straining a one man job

We guarantee that your wire will never get tangled with the Fence-Line Solutions Wire Spinner. We know that the problem with most wire spinners is jamming, so we prevent the wire from growing with our specially designed 6mm spring steel guiders, keeping loops secured and your wire pulling easy.

REMOVE THE HEADACHE FROM PULLING WIRE

How many times have you walked back to unjam the spinner, only to return 50m later to do it again? Or worse, had your partner stuck staring at spinning wire for hours on end to fix jams?

We understand that every time you walk back, it's costing you time and sanity. That's why the Fence-Line Solutions Wire Spinner has been engineered to keep your wire spinning smoothly, time and time again.

“

Top notch gear, I'm buying off these guys from now on, I stumbled on their tools when fencing with a contract fencing mate (strainers and wire spinner) and can't say I've used anything as good.

- John Mitchell
