Manufactured with CNC precision, every tooth delivers a consistent, high-performance cutting edge. Each tooth works independently to reduce cutting resistance and power demand, while balanced load distribution minimises vibration for smooth, stable, and highly efficient cutting performance.

Consistent, High-Quality Brazing of Tips

Providing each cutting edge with maximum support to prevent breakage.

Premium Quality Cutting Tips

Micro-grain carbide with a cobalt binder delivers exceptional strength and long tool life – ideal for everything from structural steel to cast iron and stainless.

CNC Machines Flutes and Cutter Body

Ensuring consistent close tolerance holes and minimising run out.

When using a cutter above 65 mm diameter, the size of the shank increases. Ensure that you have the correct arbor.
 See JEI's Adaptor (Ref JEI-ADPT19/32) to adapt a standard 19 mm shank arbor to suit.

PILOT PINS

FULLY CNC GROUND TO ENSURE A PERFECT FIT AND POSITIVE SLUG EJECTION

PILOT PINS PLAY A VITAL ROLE IN POSITIONING AND EXTENDING TOOL LIFE

- ✓ Lubricates the cutter internally by acting as a flow tap for the coolant as it retracts into the spring loaded machine arbor, increasing tool life, and ensuring slug ejection.
- ✓ Centralises the position of the hole on the pre-marked steel.
- ✓ Ejects the solid steel slug steel on hole completion.

The AirBeast® 200A is a powerful, heavy-duty pneumatic magnetic drilling machine engineered for extreme industrial applications where electric tools cannot be used. Designed for hazardous and explosive environments, it is ideal for offshore platforms, petrochemical plants, refineries, mining operations, and shipbuilding. Its pneumatic drive system, combined with a robust double magnetic base, delivers dependable performance in tough site conditions while eliminating the need for an electrical power source.

Built for high-capacity work, the AirBeast® 200A offers a 200 mm annular cutting capacity, 45 mm twist drill capacity, and tapping up to M48, making it suitable for the most demanding fabrication tasks. The convertible magnetic base allows use on concave and convex surfaces, adding versatility alongside its strength and stability. Where safety, power, and reliability are critical, the AirBeast® 200A is a trusted solution for specialist drilling in environments where conventional machines are not an option.
