

BLU INNOVATION AESTHETICS

Wellness IV & Injection Medical Assessment

All IV infusions, IM vitamin injections, NAD+, lipotropic therapy, glutathione, and weight loss injections are medical treatments. Approval is based on clinical review and, when indicated, laboratory evaluation.

Completion of this form does not guarantee candidacy.

1. Full Name

2. Date of Birth

3. Phone

4. Email

5. Service of Interest (Select all that apply)

- IV Vitamin Infusion
- IM Vitamin Injection
- NAD+ Therapy
- Lipotropic / Lipo C
- Glutathione
- Tri-Immune
- Weight Loss Injection
- Not Sure

6. Have you ever been diagnosed with:

- Kidney disease

- Liver disease
 - Heart disease
 - Seizure disorder
 - Autoimmune disorder
 - Thyroid disorder

 - G6PD deficiency
 - Anemia
 - None
-

7. Are you currently:

- Pregnant
 - Breastfeeding
 - On chemotherapy
 - On immunosuppressants
 - Taking blood thinners
 - Taking prescription weight loss medication
 - None
-

8. Have you had recent laboratory testing within the past 6–12 months?

- Yes
- No
- Not sure

I understand laboratory testing may be required prior to certain treatments.

- Yes
-

9. Have you ever had a reaction to:

- IV fluids
 - B-complex vitamins
 - NAD+
 - Glutathione
 - Lidocaine
 - None
-

10. Do you currently have:

- Active infection
 - Fever
 - Uncontrolled blood pressure
 - None
-

Acknowledgment

I understand that wellness IV therapy and injectable treatments are medical procedures requiring clinical review. Some services may be delayed, modified, or declined based on medical history or laboratory findings.

That's clean.

That weeds out:

- G6PD before glutathione
- Renal issues before IV fluids
- Oncology risks
- Blood thinner issues
- Weight loss medication conflicts
- High-risk NAD candidates

Now your structure is complete and professional.

If you want next, I can show you how to simplify your website so clients choose between:

Hair | Injectables | Skin | Wellness

Instead of asking you random questions in DMs.
