

HOMEOFFICE IQ™

The Connectivity Backup Plan

Keep your professional cool

We can't control where the construction crew decides to dig or if a squirrel decides to snack on the internet cable. But we can control how you look on Zoom when they disrupt your connection.

HomeOfficeIQ is your smart backup plan. When your primary internet takes a break, your mobile backup takes over — keeping your essential devices online and connected to Wi-Fi so you stay professional, productive, and panic-free.

How we save your work day

- ☀️ **SKIP THE TROUBLESHOOTING:** Skip the router reset anxiety — hang tight while we get you reconnected.
- ☀️ **THE QUICK SWITCH:** Stand up, stretch, and have a sip of coffee. HomeOfficeIQ is making the switch to your hotspot.
- ☀️ **BACK ONLINE:** Connected and back online in 90 seconds or less. Easy.

- ☀️ **YOU'RE IN CONTROL:** Prioritize your work connection without burning through mobile data — HomeOfficeIQ lets you choose who gets backup bandwidth, keeping your work online while cutting non-essentials (sorry, Fortnite).
