Dr. Rick Kittles

Dr. Kittles is an Associate Professor of Medicine and Epidemiology and Biostatistics, Associate Director of the Cancer Center, and Director of the Institute of Human Genetics at the University of Illinois at Chicago. His first faculty appointment was at Howard University where he helped establish the National Human Genome Center at Howard University. Dr. Kittles helped establish and coordinate a national cooperative network to study the genetics of hereditary prostate cancer in the African American community. He is well known for his research on prostate cancer and health disparities among African Americans. He has also been at the forefront of the development of ancestry-informative genetic markers, and the use of genetic ancestry to map genes for common traits and disease.

Dr. Thomas Britt, HOST

Dr. Britt is Chair and Assistant Professor of the Department of Health Studies and Health Information Administration in the College of Health Sciences at Chicago State University (CSU). Dr. Britt a Radiology Consultant, an American College of Sports Medicine certified Health Fitness Specialist, was appointed, Graduate Faculty Status by the School of Graduate and Professional Studies at CSU.
