

Dr. Kimberly Outlaw- Member At Large

Why would you like to serve on the ASWIS Executive Committee (150 words maximum)?

I have served in various capacities within ASWIS, most notably as Treasurer and Certificate Program Chair. As one of the founding members, I am highly familiar with the organization's operational roles and responsibilities, and I understand how they should function effectively. During my tenure as Treasurer, I ensured that the alliance maintained accurate financial records and consistently recorded profits. When I assumed the role of Treasurer, the organization was experiencing challenges due to previous overspending; however, I have worked diligently alongside our executive members, especially the past few Presidents, to promote stability and fiscal responsibility. I now feel confident in my ability to contribute as a member at large within the Executive Team. I am committed to serving on the Executive Team because I helped establish this organization, and I want to help ensure its continued success and bright future.

What are your qualifications for this position? Please be sure to outline previous leadership experience, relevant professional experience, and ways you've impacted the success of the Alliance (200 words maximum). We are currently in the process of transitioning the Certificate Program from Tulane University to the University of Kentucky. During my tenure as Chair, I successfully managed record enrollment levels. I have also actively contributed to recruiting students, organizational members, and speakers for our annual conference, fostering participation and engagement. I am available to assist the Treasurer, leveraging my previous experience in that role, and can support the Secretary with recording and distributing meeting minutes as needed. Additionally, I will continue to promote initiatives aimed at increasing membership in ASWIS beyond current efforts during the enrollment period as Certificate Chair. I am also willing to support the team and room coordinator in preparing for the upcoming annual symposium.
