

## REAR SUPPORT TREATMENT CENTER

[WWW.BOWWOOD.NET](http://WWW.BOWWOOD.NET)

When form and function merge within a singular design focus, something remarkable happens.

**Undermount drawer slides:** *Out of sight, out of grime. Having the mechanism beneath the drawer eliminates the oil and dirt buildup standard side-mount hardware causes. Not to mention the nearly silent, 100lb soft-close movement.*

**Metal drawer sides:** *Robust, seamless, and refined. Our most resilient, most easy-to-clean design yet. And aesthetically pleasing. This drawer embodies our brand's Signature quality.*

**Routed plywood bottoms:** *Our cabinets feature genuine plywood bottoms, which is water-resistant. Pre-machined openings in the bottom of each cabinet box enable effortless routing of electrical conduits and cables. Each cabinet's interior details are meticulously designed for optimal functionality.*

## Rear Support Treatment Centre

### COUNTERTOP PROFILE

As distinctive as it is easy to clean, our profile portrays a confident professionalism that underpins your own expertise in caring for others.

### GLOVE DISPENSER

Easy to see and reach, our glove dispensers support your staff in the fight against contamination. Reloading is simple and takes mere seconds.

### STAINLESS STEEL

When only the best will do. Structural and as durable as it gets. From kick base to valence our laser cut parts give a solid rigidity that ensures your care is the best it can be too.

### GLASS INSERT

Sleek and sharp looking. Our glass insert doors provide instant visual access to stock levels and item locations. Why not set your office apart by adding your corporate logo to the look as well?

### POWER HUTCH

Our drive for efficiency goes even further with USB type A & C data hubs, power plug-ins, and tip out bins; packing a real powerhouse of efficiency at your finger tips.

Serving all of North America
