

INTACT NDT

Capability Statement

About Us

Intact NDT PTY LTD is a provider of Non-Destructive Testing (NDT) services, delivering precise, reliable, and compliant inspection solutions to ensure the integrity and safety of critical assets. As an experienced subcontractor to KRM Welding Solutions, a NATA-accredited facility, we adhere to the highest industry standards, serving sectors including mining, power services, oil and gas, fabrication, and steel manufacturing.

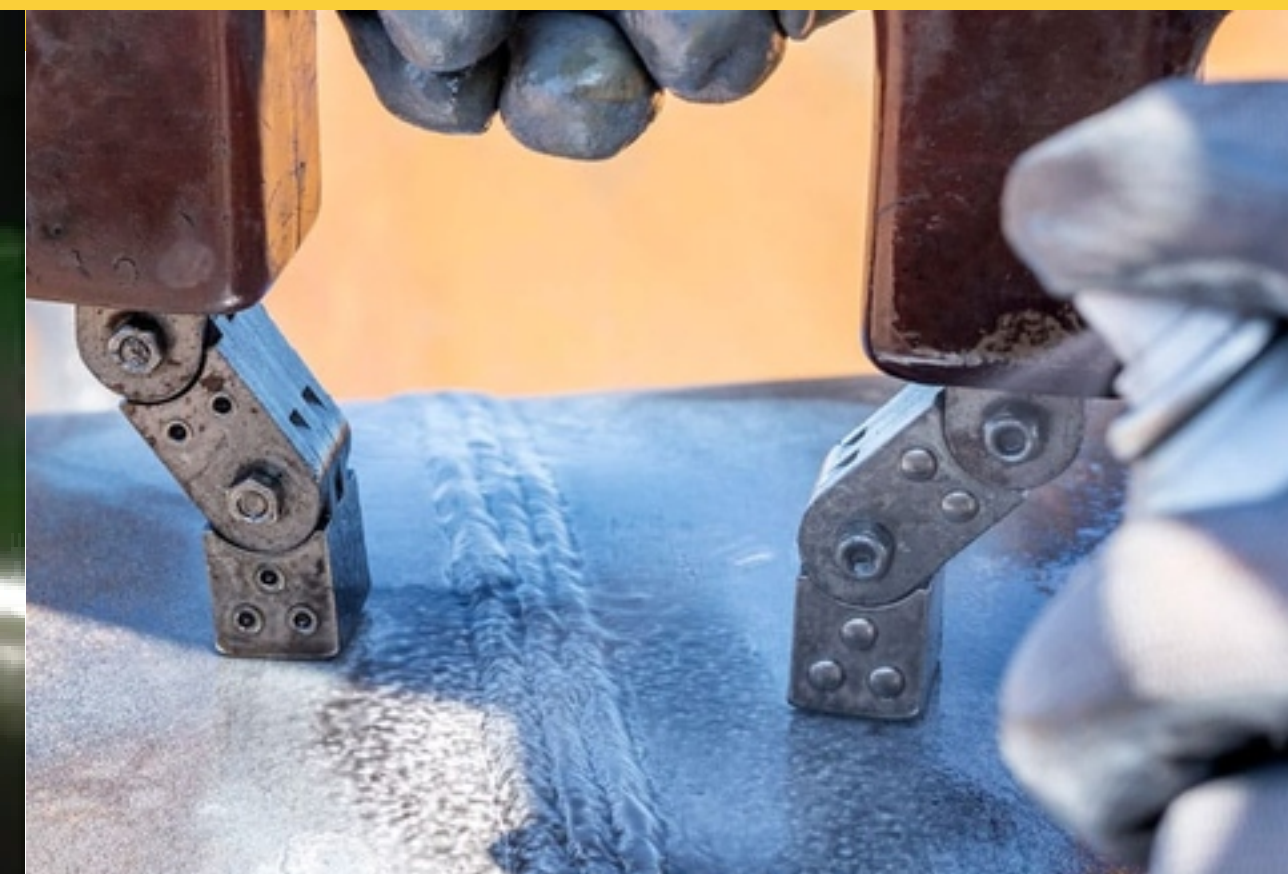

INTACT NDT

Our Services

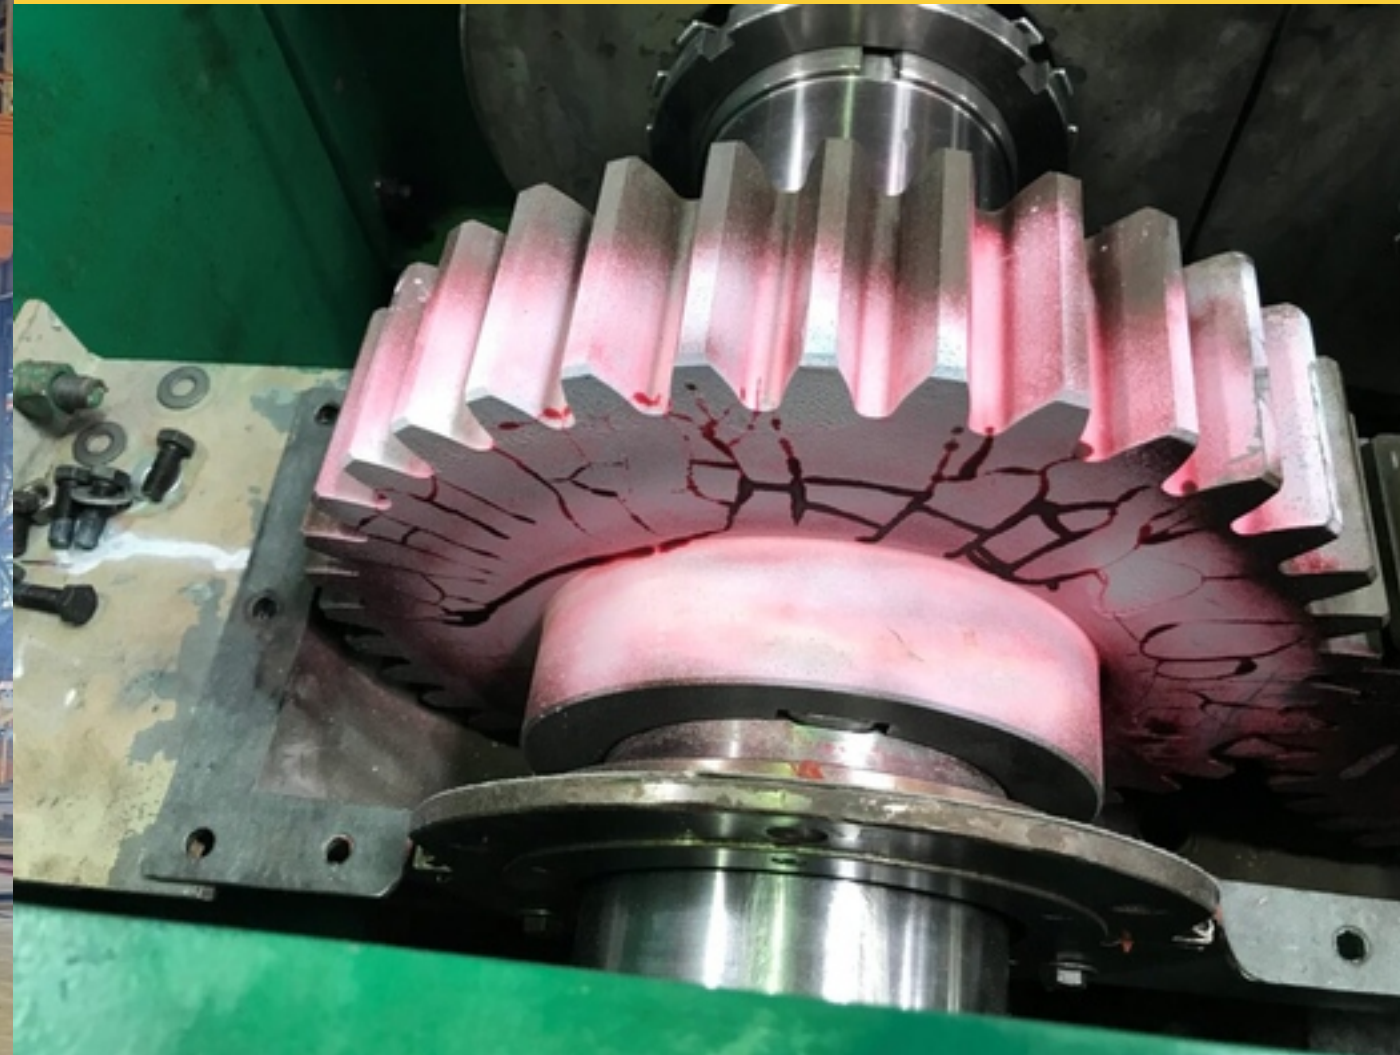

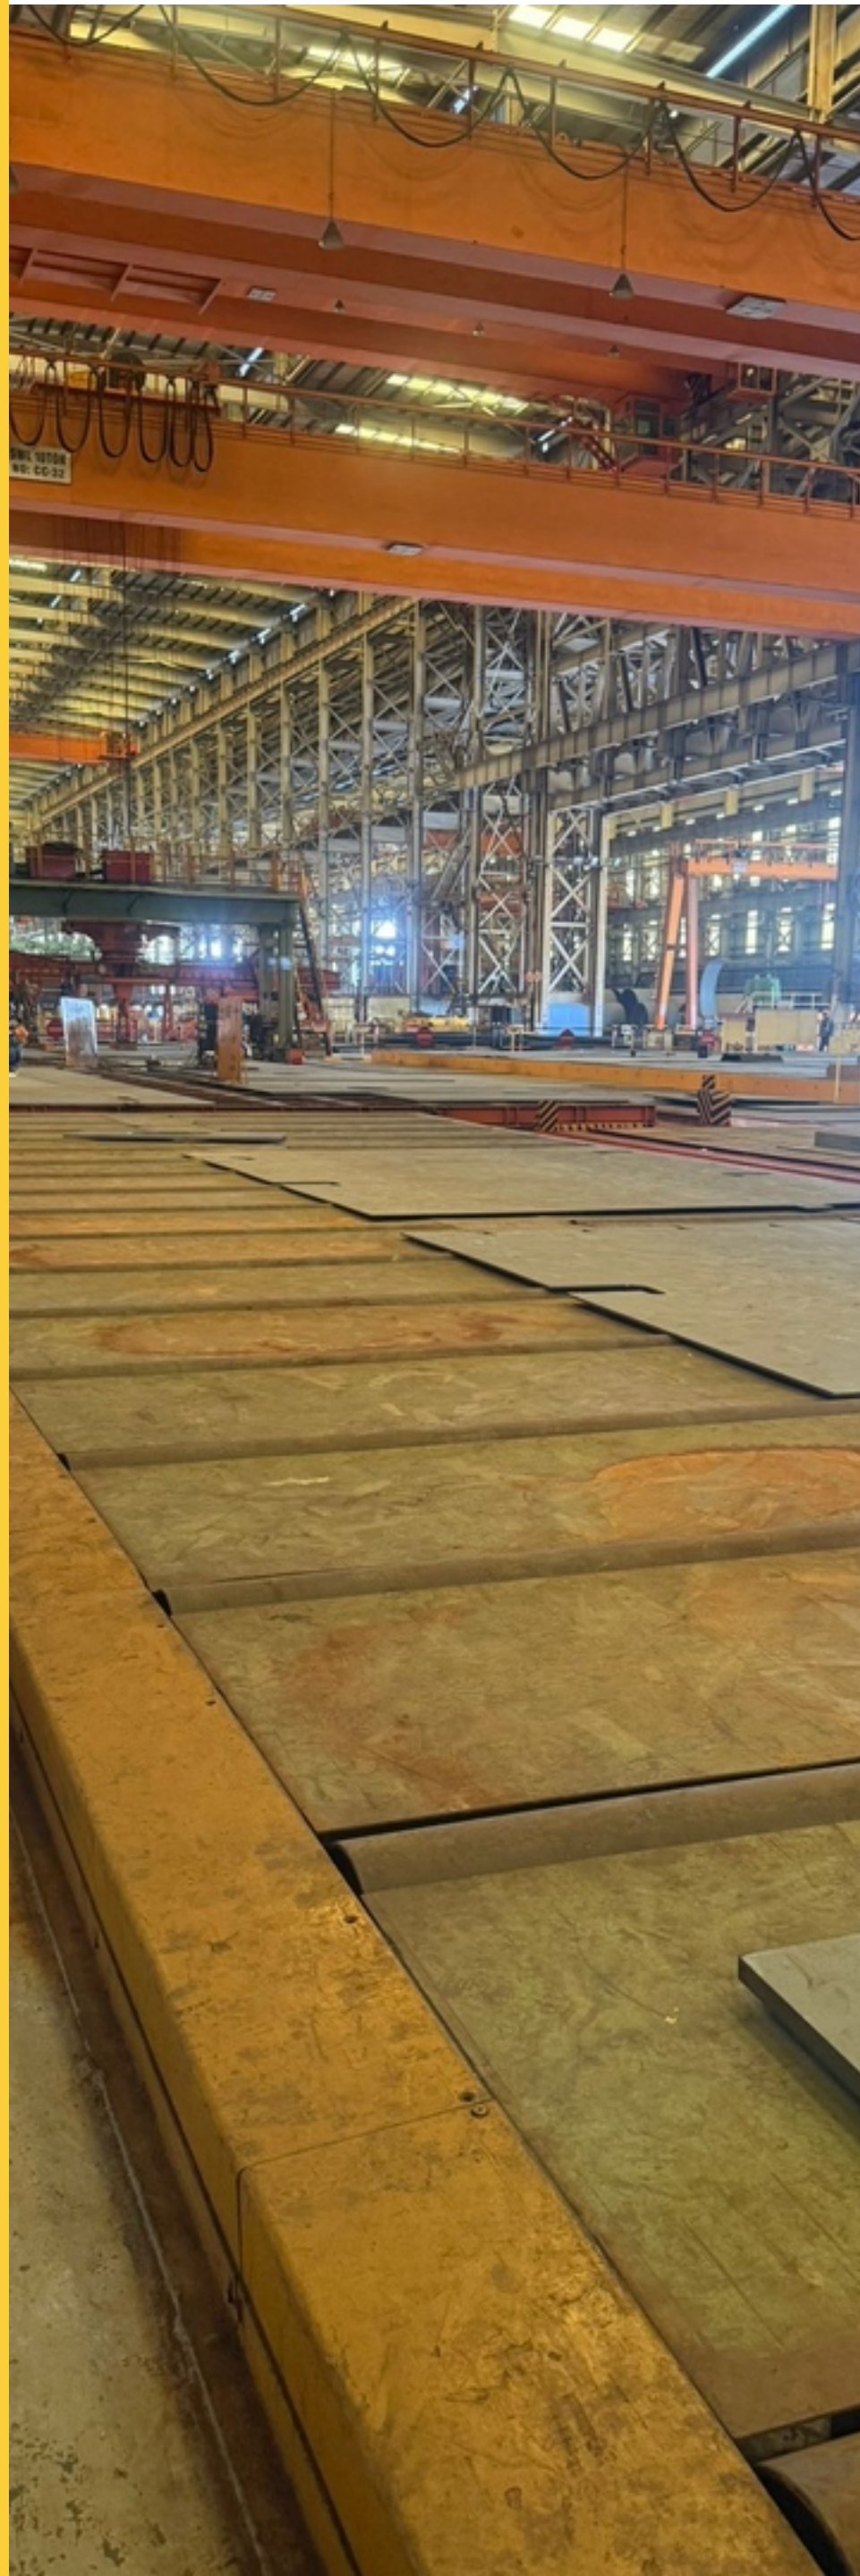

Visual Inspection (VI):
Thorough examination of newly fabricated, in-service, and repaired welds to ensure compliance with industry standards, identifying defects to guarantee structural integrity and safety.

Magnetic Particle Inspection (MPI):
High-accuracy detection of surface and near-surface flaws in ferromagnetic materials, including welds, castings, forgings, and machined components.

Our Services

Dye Penetrant Inspection (DPI):

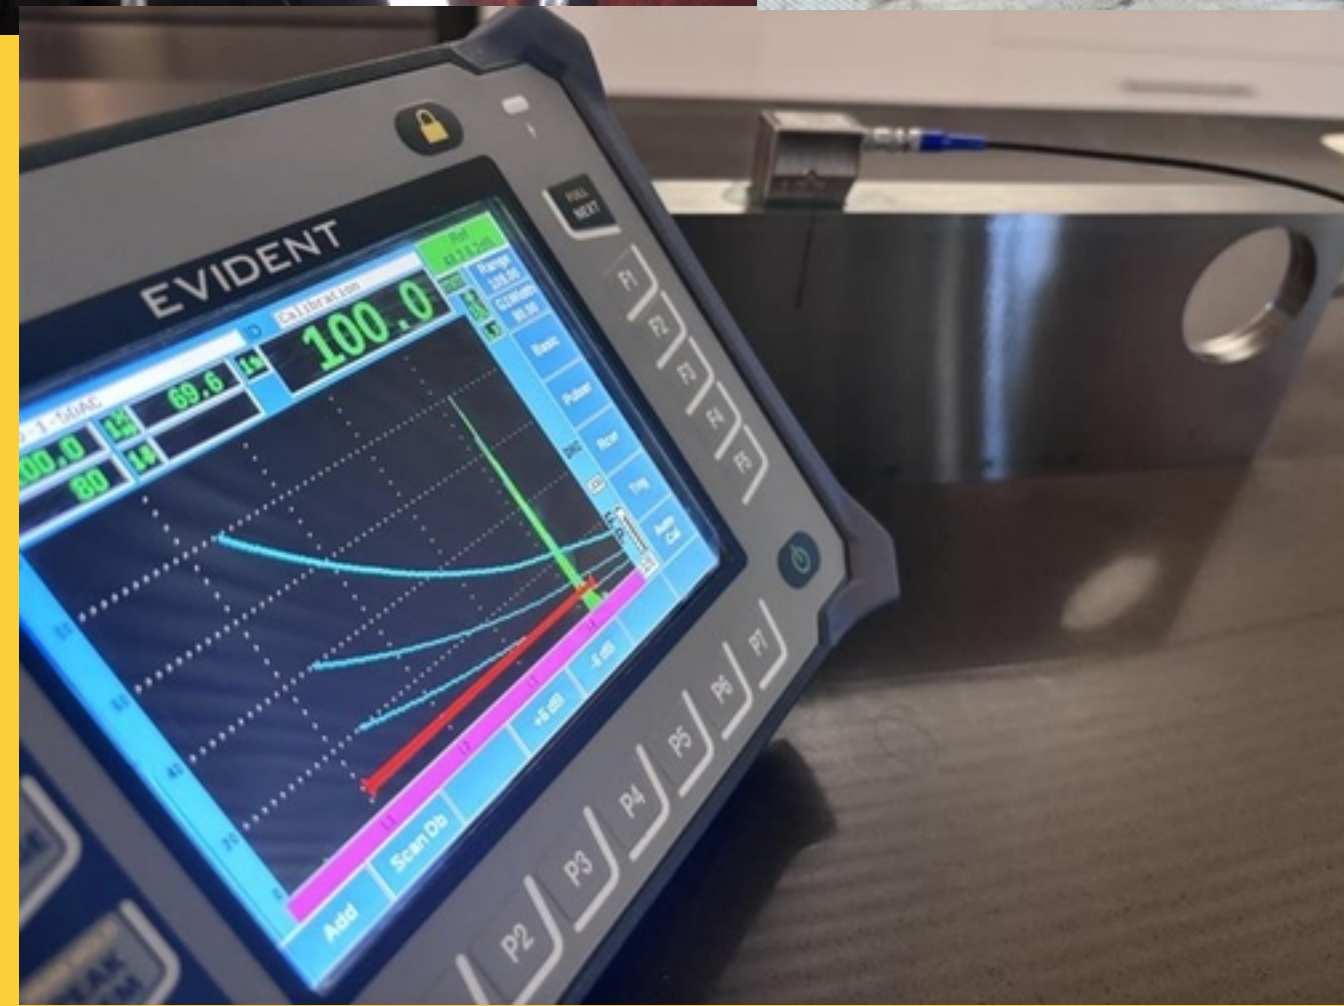

Identification of surface-breaking defects in non-porous materials, ideal for complex and non-ferromagnetic components.

Ultrasonic Thickness Testing (UTT): Precise measurement of material thickness to assess corrosion or erosion in critical assets.

Our Services

Ultrasonic Inspection (UI):
Detailed internal examination
of welds, castings, and
forgings to verify structural
integrity.

"Precision Testing, Trusted Results"

Industry Applications

We proudly support a range of industries, ensuring operational safety and compliance with regulatory standards:

Power Services: Inspection of turbines, pipelines, and critical infrastructure.

Fabrication: Verification of weld quality and material integrity to meet various codes and standards.

Mining: Ensuring reliability of heavy machinery and structural components.

Oil and Gas: Testing pipelines, pressure vessels, and offshore equipment.

Steel Manufacturing: Assessing castings, forgings, and rolled products during production and in-service stages.

Commitment to excellence

Intact NDT PTY LTD is dedicated to delivering exceptional quality and safety. Our team holds AINDT-ISO 9712 Level 2 and Level 3 certifications, ensuring expertise and precision in every project. As a subcontractor to KRM Welding Solutions, we comply with rigorous NATA-accredited standards. Through continuous training and investment in advanced technology, we provide dependable, efficient, and compliant NDT solutions tailored to your needs.
