

## **Haiti - House #204 Jean Telet Louis Family**

**Jean Telet Louis is one of the original HMI mason team that built the first HMI home in 2010. He lives in the Ravine Sable area near the bridge crossing the ravine. He lost his wife some years ago and has been living with family members in the tin/tarp created shanty seen in the “before” picture. What a joy for him and his family that after building over 200 beautiful homes for others, he will finally find himself living in one of them. God bless all who have helped in any way to bring about this “impossible dream” in their lives.**
