

Haiti - House #212 The Jean Louis family

Reginald Jean Louis and Carline Auguste have two children and have been living in this little rapidly deteriorating shanty. A friend of theirs, Tete Chery, has been an incredible blessing to the work of HMI. As an architect, she has helped design and supervise the construction of everything HMI has built in Haiti. In honor of her 50th birthday, the donors and the selection committee let her select a family that she determined was most in need at the time to receive a home. Reginald and Carline in Nan Repo were who she selected. They eek out a living primarily on farming. Carline takes care of the kids, helping with the family garden and tending to the little place they call home. She sells what she can and when she can at a roadside stand and in Jeremie. They are Catholics but don't walk regularly to church on Sunday because of the long, difficult distance involved. They send their heartfelt thanks and prayerful appreciation to all who have helped in any way to make this possible. Most especially they wish Tete a **HAPPY BIRTHDAY!**
