

Haiti - House #247 Melville Family

Mrs Clemence Melville and her husband, Certil Joseph are both 74 and have been living with some of their 6 children and several of their grandchildren In the piecemealed shanty that you see in the “before” picture. (The community they live is a distance from Numero Deux located in upper Bec's s/d). Mrs Clemence has a little roadside stand where she tries to sell little items while her husband farms as he can to support the family. They are prayerful Catholics but given their age and the distance they would have to walk, they come rarely to church. They are so thankful for this Christmas miracle and send their deepest appreciation to all who helped in any way to make this happen in their lives.
