

Haiti - House #250 Dominique Family

Farah Dominique and her husband, Frantz François, have only one daughter. They live in the pitiful, scrap tin shanty that you see in the “before” picture with Farah's aunt who has serious eye issues. Farah is a very dynamic woman. She tries her best, along with her husband to take care of and educate their daughter. When the house is completed, she expects her elderly and frail uncle who for many years has been asking Fr. Joe for a decent place to live, to move in with her. This family is so thankful to the HMI donors for getting them out of the pitiful squalor and into a decent home where they can care for their elderly family members. God Bless all who helped make this possible.
