

Haiti - House #252 Raymond Smith family

Raymond Smith, his wife, Widiana Beauchamp and their one little girl have been living in this piecemealed, old tin shanty that you see in the “before” picture. He is a hard-working cement mason working for HMI. His wife Widiana, tries to help the family by selling little things they produce in their home garden and other little items at a roadside stand. Despite their industriousness, they would never have been able to escape the desperate situation in which fate had placed them. Their hopes and dreams are realized in January 2022 when they were advised that they would be the recipient of a new HMI home. They send their prayerful appreciation to all who helped make this happen in their lives.
