Location of the Project:

VIJAYANAGARAM VILLAGE
CHAPADU – MANDALAM
CUDDAPAH – DISTRICT

516356

ANDHRA PRADESH –

STATE – INDIA

BENEFICIARIES OF THE PROJECT:
families.

3000 Backward and Dalit

Project Proposal:

Vijayanagaram has developed as a village in recent years. This is in-between two major villages Allaldupalle and Chinnaguruvalur in Chapadu Mandalam. During the famine of 1980s most of the working people from different nearby villages migrated in search of work and livelihood and settled as a group in this place and called it Vijayanagaram. All these people are farmers and manual workers in the agricultural fields. This is a mixed community of different castes and in the major classification of Backward and Dalit castes. The government welfare facilities and benefits are very minimal in this village as is drinking water. The people go to different places to get some water for their needs since there is only one well on one end of the village for over 10,000 people. Our Missionary Society team visit this village periodically to instruct little children and elders in proper hygiene in order to prevent health problems. The village's people have numerous times made requests for another well. I place this request into your hands for sympathetic consideration because of the critical situation this village finds itself. As I believe in the providence of God and the blessings and graces of INFANT JESUS OF PRAGUE I submit this project, praying that it will be granted. Please be kind enough to grant this project for the thirsty people of Vijayanagaram.

The longitude and latitude of Vijayanagaram village as it is not reflected in the map but it is in the middle of Alladupalle 14.712289 – 78.680467 and Chinnaguruvalur 14.697014 – 78.693685. If you have any clarifications or doubts, please contact me and I am willing to clarify the matters.

Thank you so much Lloyd and I wish you every Blessing from INFANT JESUS OF PRAGUE.

Fr. Shoury.
