

Kenya - Water Well #1

ENCHORRO-ENKAI PRIMARY SCHOOL
P.O. BOX 81 – 00209
LOITOKITOK.

10TH APRIL 2018.

TO
HOW GLOBAL

Dear Sir/Madam,

RE: INVITATION

Enchorro-Enkai Primary School is located 80kms away from Nairobi Kenya along Emali – Loitokitok road. The school has an enrollment of 374 pupils from preprimary one to grade 8. The pupils are served by teachers. The principal is Mr. George Kariuki.

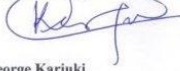

We humbly request you to pay a visit in June 2018 upon your travels. We hope to apply to become one of your green hubs. We don't have running water also we don't have gutters to trap rain water.

We are excited to instill environmental and health lessons as part of our teaching plans. We are willing to invite the surrounding community to engage them and share information. We do understand your concept of our school acting as a model to our community.

We are prepared to propose local workers budgets as our part of our plan of your organization bringing water to our school and the surrounding community. Our area is semi-arid, water is scarce. The people are pastoralists and even they don't have electricity in their homes. Some homesteads are near the school while others are far away over 6kms. None of the teachers stays in the school compound. They commute daily to and from the school.

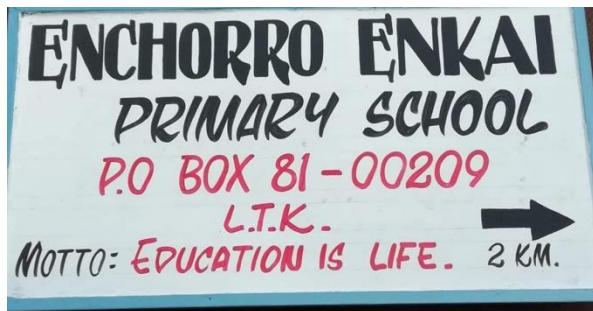

Thank you and hope to see you soon.

Yours faithfully,

George Kariuki
Principal Enchorro-Enkai Primary School
