

March 2020 Uganda Well Report

Hi Dn Lloyd, Greetings from Uganda. Last week, I visited the communities of bughangha, Mella A , Mella B, Doko and Namahoho to ascertain the performance of the boreholes. I am glad to inform you that all are functioning well except the one at Namahoho. The chain dropped and the community has had no clean and safe water for the last two weeks. I sent the engineer yesterday to establish how to rectify the problem. We need a new chain which the community. (two weeks later) The Namahoho borehole has been successfully fixed and the water also treated. The water is clean and flowing well. The engineer was able with the remaining water treatment chemical to treat the water in Mulagi and Bughagha boreholes. The people are happy and they thank you very much Pray for us as we pray for you. God bless. Fr. Thomas Aquinas
