Dear Madam Rachael

**Subject: Request for Assistance to Construct a Borehole and Provide Running Water**

Greetings in the name of our Lord.

I am writing on behalf of Sing'endende Christ Mission School, located in the rural area of Southern Province, Kazungula District of Zambia, to humbly request your support in addressing a critical need for safe and reliable water at our institution and the surrounding community. This school is ministry of Embassy of change Ministries of Livingstone

Sing'endende Christ Mission School currently serves a total enrollment of 150 learners. In addition to the school population, the surrounding community consists of over 650 people who would greatly benefit from improved access to clean water.

At present, both learners and community members depend on unsafe and distant water sources, as illustrated in the attached photos. Children are forced to draw water from shallow, unprotected wells and nearby streams, which are often contaminated. In summer or dry season, they cover about 2 kilometers for them to get water. This situation exposes them to serious health risks such as waterborne diseases and negatively affects school attendance, dignity, and overall well-being.

The lack of a clean water supply also affects sanitation, hygiene, and the learning environment at the school. In many cases, learners—especially young children—spend significant time and energy fetching water instead of focusing on their education.

In light of this, we are kindly requesting your assistance in the following:

- Drilling and installation of a borehole
- Provision of a water pump system

- Establishment of a reliable running water system to serve both the school and surrounding community

This request is not merely about infrastructure—it is about transforming lives.

Access to clean and safe water will mean:

- Children can attend school regularly without the burden of searching for water
- A significant reduction in waterborne diseases within the school and community
- Improved hygiene and sanitation, especially for young learners
- Restoration of dignity for families who currently depend on unsafe water sources

Every drop of clean water will represent hope, health, and opportunity.

We humbly appeal to your compassion and commitment to making a lasting difference. Your support will not only meet an immediate physical need but will also invest in the future of over 650 people, empowering children to learn, grow, and thrive in a safe environment.

By partnering with us, you become part of a life-changing mission, bringing sustainable transformation to a vulnerable community. This borehole will stand as a lasting legacy of care, impacting generations to come.

We would be deeply grateful for any assistance, partnership, or guidance you can provide toward making this project a reality.

Thank you for your time, generosity, and consideration. We look forward to your positive response.

Yours faithfully,

Weaker Moyo
