

Position: Multi Service Operator (MSO)

Location: Broussard, LA

Reports to: Operations Manager, Broussard

About Us: OSP is a leading provider of innovative technologies and services for the oil and gas industry. With a strong commitment to quality, sustainability, and safety, we strive to deliver unparalleled performance and reliability to our clients. Our team is dedicated to pushing the boundaries of innovation while maintaining the highest standards of operational excellence.

Job Overview: We are seeking a highly motivated Downhole Service Tool Specialist to support deepwater offshore and international operations. This role is critical to the successful execution of complex well construction, completions, and intervention programs.

You will serve as the technical lead on downhole tools, ensuring equipment is properly deployed, and operated in high-pressure, high-risk environments. This is a hands-on role requiring strong mechanical aptitude, offshore experience, and the ability to perform under pressure.

Key Responsibilities:

- Execute offshore and international downhole tool operations in deepwater and land environments.
- Lead rig-up, function testing, and deployment of service tools (packers, storm valves, cement heads, cement retainers and bridge plugs, wireline and tubing conveyed, setting tools, etc.)
- Serve as the on-site technical expert, deploying tools in real time.
- Work directly with Company Men, drilling/completions engineers, and rig crews.
- Complete detailed job reports, run sheets, and post-job documentation.
- Support tool assembly, redress, and maintenance in the shop.
- Promote and uphold strong safety and operational discipline.

Qualifications:

- **Required**
 - o 10+ years of experience with downhole tools, well construction, or well intervention
 - o Proven deepwater offshore experience
 - o Strong mechanical and troubleshooting skills.
 - o Ability to read and interpret technical drawings and well programs.
 - o Willingness to travel offshore and internationally.
 - o Valid offshore certifications (BOSIET/HUET, medical, etc.)
- **Preferred**
 - o Experience with HPHT tools (10k-15k+psi systems)
 - o Knowledge of packers, completion tools, and intervention equipment
 - o Previous field leadership or supervisory experience

Work Environment:

- Deepwater offshore rigs in the Gulf of America
- International offshore and onshore operations

- Shop environments for tool preparation and maintenance
- Rotational schedules with extended travel

Why Join Us:

- Work on technically challenging deepwater operations
- Be part of a team focused on precision, safety, and performance.
- Opportunity to support global operations and expand your expertise.
- Competitive compensation, travel opportunities, and career growth
