Adult Feeding Guidelines:

FEEDING GUIDELINES RATIONS RECOMMANDÉES GUÍAS DE ALIMENTACIÓN		
kg	lb	
2 - 5	4.5 - 11	1/3 - 2/3
5 - 10	11 - 22	2/3 - 1
10 - 20	22 - 44	1 - 1 1/2
20 - 30	44 - 66	1 1/2 - 2
30 - 50	66 - 110	2 - 3
50 - 80	110 - 176	3 - 4

= 1 cup/tasse/taza (250 ml - 8 fl oz) = approximately/
environ/aproximadamente 160 g/5.64 oz

Note: All feeding amounts listed are daily feeding amounts.

AAFCO Statement:

Formulated to meet the nutritional levels suitable for Maintenance.

Additional Information:

Serve dry & have fresh drinking water available at all times.
Avoid over feeding. Monitor your dog's weight, reduce or increase feed ration as needed. No supplements or additives required. Store in a clean & dry location.

What Do Those Numbers Mean?

The two numbers represent the Protein and Fat percentages of the food. Inukshuk 32/32 has 32% protein and 32% fat. Our formulas correspond to the increasing needs of dogs as they work harder This common ingredient base allows the dog to move up or down within the Inukshuk product range without any digestive upset.

Why Does Protein Matter?

Protein has several roles in a dog's body. It provides the energy needed in repairing and building muscle tissues, growing new skin cells, hair, nails, it creates the hormones and enzymes needed to function normally and it keeps their immune system strong. Two of the best sources of protein are chicken and fish, which are key components of Inukshuk Dog Food.

Why Does Fat Matter?

Dogs use fat as their primary source of energy, therefore, it is very important that high energy dogs use food that can meet their needs. Fats are a dense source of energy that is necessary to keeping your pet active and healthy. They help maintain a shiny coat and can prevent skin disorders.

Inukshuk 32/32 is the highest energy dog food on the planet. Here's why: <https://vimeo.com/572566822?fl=pl&fe=sh>
