TANNING

COLLAGEN INDUCTION TAN CAN	PRICE	DURATION

5 SESSIONS	700	
10 SESSIONS	1300	
20 SESSIONS	2500	

This specialized tan can is the safest and quickest way to get a natural glow. The Collagen Rubino Tan Can protects your skin with the infrared lights, which gaurantees no UV damage and is safe for all skin types. The only tan can that stimulates collagen production and enhances skin elasticity, whilst achieving that glow.

SPRAY TAN

VENETIAN BROWN (LADIES)	600	30 min
RAPID TAN (LADIES)	600	30 min
VENETIAN BROWN (GENTS)	700	30 min
RAPID TAN (GENTS)	700	30 min

We only use the best of the best - imported from America. Our tanning solution will not leave you streaky or orange. We guarantee a glowing tan. The Venetian Brown or the Venetian Brown Plus, develops over 8 hours. If you are in need of a quick tan, we recommend the rapid tan, which will develop over 3 hours.

SPRAY TAN INSTRUCTIONS - PRE & POST TAN PERFECTION

PREP: Exfoliate thoroughly using a mitt, or exfoliating gloves. Focus on dry areas (elbows, knees, ankles, feet, and hands). Shave or wax at least 24 hours before your session to allow pores to close and prevent dark spots.

On the day, shower before your appointment to remove sweat, deodorant, perfumes, oils, and makeup (they can block the tan from absorbing evenly). Do not apply deodorant, perfume, body lotion, or makeup after showering.

Wear loose, dark clothing and sandals/flip flops (avoid tight bras, jeans, or socks that may rub your tan off). We cannot be responsible for the tan being removed after wearing tight or elasticated clothing once you leave. Remove all jewelry before your spray tan.

Avoid water & sweating: do not shower, swim, exercise, or get wet until your first rinse or shower (usually 6–8 hours or best results overnight).

AFTER: Wear loose, dark clothing to avoid rubbing off your tan while it develops. With your first shower, rinse lightly with lukewarm water only, no scrubbing (soap can be used in intimate areas). Pat your skin dry with a towel - do not rub.

Moisturizing will help extend your tan. Avoid exfoliating, shaving too often, or using harsh soaps—these will fade your tan faster. Limit long hot showers, baths, and swimming in chlorinated pools or the ocean, as they can strip color.

Pro tip: Hydrated skin keeps your spray tan looking fresh, natural, and radiant for up to 7–10 days.
