

Nutrimol[®] 4 Calves

Tech Sheet
August 2021

For healthy robust calves

Bell³Booth

The health and well-being of young calves are paramount in setting them up for their productive adult years. During the first three months of life, a calf must achieve its daily liveweight target; otherwise, future targets will be missed, and its overall growth and development restricted.

Nutrimol 4 Calves formulation is based on Bell-Booth's original Nutrimol Classic, one of New Zealand's iconic products respected by the dairy and beef industry. Seaweed has long been dosed to improve animal health and well-being through increased immune system function.

Utilising the benefits from all-natural sources; **seaweed, prebiotics, apple cider vinegar** and **garlic**, **Nutrimol 4 Calves** will support the immature calf's health, growth and development during the milk feeding phase and post-weaning.

An animal with a strong appetite, a functional immune system, and a healthy dietary tract will achieve better liveweight gains, be less likely to scour and generally be in good health. Calves with strong vigour are easier to rear, transition without 'check' during weaning and continue to grow post-weaning.

Add a daily dose of **Nutrimol 4 Calves** to your calf's milk source or add to their water troughs post-weaning.

Best practices

1. Ensure all calves receive adequate quality colostrum during the critical first 24 hours of their life.
2. Follow calf rearing good practices. Refer <https://www.dairynz.co.nz/animal/calves/calf-care/>
3. Add Nutrimol 4 Calves consistently every day for best results.
4. Nutrimol 4 Calves is suitable to be fed with wholemilk, colostrum or calf milk replacers.
5. There is no milk or meat withholding period.

Dose rates

Milk fed calves

From 4 days old until weaning 3mL/calf/day

From weaning

Once off milk dose daily or drench every 21-28 days

Daily dose via stock drinking water 3mL/calf/day

Drench gun every 21-28 days 20mL/calf/day

Active ingredients

Total non-volatile solids	271 g/L	Calcium	2.4 g/L
Organic Matter	156 g/L	Cobalt	14 mg/L
Mineral Matter	125 g/L	Copper	70 mg/L
Crude Protein	22.7 g/L	Iodine	300 mg/L
Sucrose	10.2 g/L	Magnesium	1.9 g/L
Chloride	12.7 g/L	Manganese	44 mg/L
Sodium	38 g/L	Molybdenum	14 mg/L
Garlic Cider Vinegar	30 g/L	Phosphorus	1.4 g/L
Prebiotic	35 g/L	Potassium	7.7 g/L
		Zinc	188 mg/L
