

Here's just a quick update of our analytical microscopy capabilities:

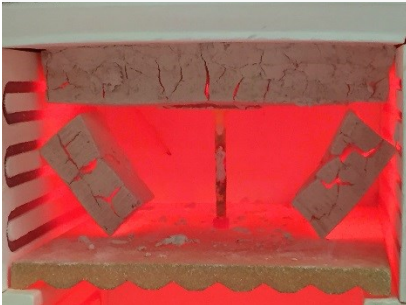

Forensic Metal Testing Weathered Metal Box Analysis

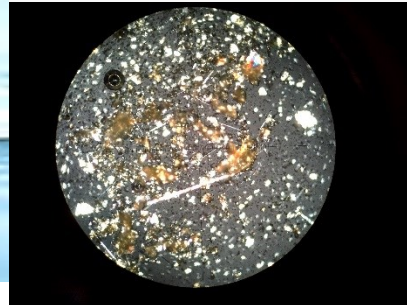

Forensic Dust Testing Contaminated cabinet surface

Product Failure Testing Cement Fiber Release After Furnace

Forensic Dust Testing Fiber ID by Polarizing Light Microscopy

MAS Serves: aerospace, automotive, nuclear, chemicals, oil and gas, polymers and plastics, packaging, adhesives, medical devices, textiles and apparel, building materials, electronics, composites, consumer products and nanomaterials areas.

- **Surface Analysis: elemental analysis, structural analysis including failure, defects and impurities.**
- **Particle Analysis: particle analysis and identification, particle size, particle size distribution, surface area measurement and morphology.**
- **Polymer Microscopy : structural and chemical characterization**
