

Terrazza Greeny PRO[®] consists of :

1. Terrazza Greeny Pro machine:

Power	: 18V DC - 5.2 Ah or 10Ah
Brush diameter	: 260 mm
Velcro disc diameter	: 350mm
Tool rpm	: 65-250 rpm
Weight	: 2.7kg (without brush)
Battery spec	: standard CAS battery can be used
Terrazza battery versions	: 18V DV -5.2 Ah (Li-ion)
	: 18V DC- 10.0 Ah (LiHD)
Terrazza battery charger	: ASC 55

Optional

2 x battery
5.2 Ah

1 charger

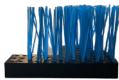

Terrazza Greeny PRO[®] options :

Battery 5.2 Ah
Battery 10 Ah

Charger ASC55

Greeny brush element
Soft or Abrasive

Terrazza Greeny PRO[®]

NURSERY ECO CLEANER

Terrazza MC[®]
Innovators in **green**
cleaning technology

Terrazza Greeny PRO®: cleaning your nursery tables without damaging the surface.

Terrazza Greeny PRO®: The Ultimate Solution for Clean and Maintained Nursery Environments

The innovative **Greeny® brush** makes the **Terrazza Greeny PRO®** the optimal machine for **cleaning and removing moss, dirt, and weeds from all types of nursery tables**—whether using woven or non-woven anti-root control fabric—as well as from **aisles, passageways, and working areas**.

The **Terrazza Greeny PRO®** features an **electro-engine** that allows for reduced brush rotation speed. This unique attribute effectively eliminates weeds, dirt, discolorations (including algae and salt deposits), and slippery substances from anti-root underlays, aisles, and working areas. Importantly, cleaning and weed control with the **Greeny PRO®** is **chemical-free**, significantly reducing environmental impact, and **eliminates the need for high-pressure or thermal treatments**.

The **Greeny®brush**, made from a blend of synthetic and abrasive fibers, ensures thorough and safe cleaning across all geotextiles. Its dual-fiber design easily removes weeds, dirt, mud, and sticky materials, maintaining a pristine environment.

Greeny PRO®: Advanced Rotation Speed Control

The **Greeny PRO®** offers **adjustable rotation speed control**, allowing users to tailor settings to their needs. The lower speed setting is especially effective for uneven or challenging surfaces, providing enhanced stability and precision. In contrast, the higher speed setting delivers optimal performance for thorough cleaning across various surfaces. Experience the exceptional versatility and efficiency of the **Greeny PRO®** for all your cleaning needs.

Specifically developed to meet the demands of nurseries and arboriculturists, the Terrazza Greeny PRO® is the ideal solution for maintaining both indoor and outdoor infrastructures, ensuring your horticultural spaces remain clean and well-kept.

Sustainable and ecological maintenance of your infrastructure

Greeny PRO®: Versatile Cleaning Solution for Nursery Tables and Platforms

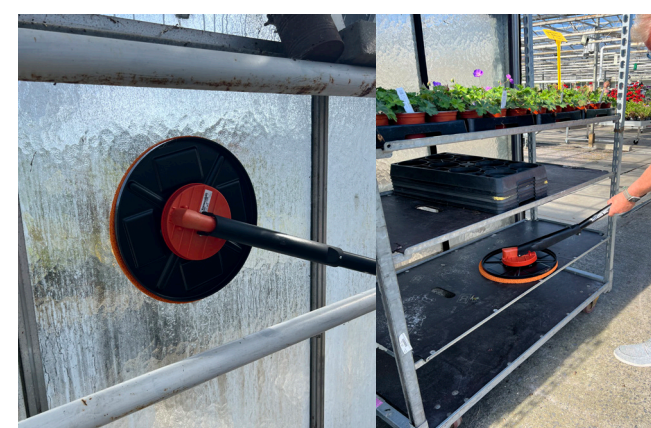

The **Greeny PRO®** enables efficient cleaning of all types of nursery tables and platforms, both with and without geotextile covers. Depending on the surface type and level of pollution, cleaning can be performed **with or without the use of water**, providing flexibility for various cleaning scenarios.

The **Terrazza MC** incorporates a unique concept that combines perfectly controlled **vertical pressure, minimal resistance, and reduced rotation speed**. Cleaning with the **Greeny PRO®** ensures a chemical-free process, making it the ideal tool for use around plants and humans.

Thanks to the synergy of reduced rotation speed and resistance to vertical pressure, the **Greeny®brush** effectively removes weeds and moss from both surfaces and joints. Additional paths, aisles, working areas, terraces, and walls—whether concrete or tiled—will appear clean and well-maintained in no time. The long synthetic fibers of the patented **Terrazza** brush **penetrate deeply into joints, delivering immediate and long-lasting results**.

The **Terrazza Greeny®brush** is specifically designed to deep clean geotextiles and other technical structures on nursery tables and supports. The operator can swiftly clean surfaces of any size, whether large or small, without the need for extensive preparation. The machine's minimal side projection allows for effective cleaning even in crowded environments, such as when customers or colleagues are present.

Flexible cleaning of various structures is achievable, including walls, steps, doors, and transportation carts. Experience the unmatched versatility and efficiency of the Greeny PRO for all your nursery cleaning needs!

Unique and efficient: the Terrazza Greeny PRO®

Thanks to the **weight optimization and the balanced handlebar** the machine is **extremely manoeuvrable**.(**battery weight can be turned for better balance**)

The **brush rotates at a reduced speed** which has following advantages:

- **no projection** of weeds, mud or sharp objects.
- **avoids spreading seedlings**.
- **no damage** of the surface, borders or sprinklers.
- relatively **little dust**, so comfortable to work with, inside and out.
- the brush cleans thoroughly, especially with the use of water.
- the **Greeny®brush** also makes the surface nice and smooth – takes away slipperiness.
- **saves time** in the daily cleaning routine.

Additional Advantages:

- Supplied with an extra **Velcro plate** that permits the adaptation of **several cleaning pads** for additional cleaning applications (e.g., glass, plastics, metals).
- Compact dimensions simplify storage and transport.
- The machine comes with a convenient carrying case for easy mobility.
