

The Terrazza Geotex[®] PRO Kit consists of:

Geotex PRO[®] Machine – Petrol Engine / Electric Motor

Power	: 4,5 kW/ 3,5 kW EGO
Engine type	: Honda GXV petrol engine / EGO PU2700
Rotation speed	: +- < 200 rt/min
Weight	: 79 kg
Dimensions	: 160cm x 80cm x 73cm
Sound pressure level	: 88 dB(A) / 74 dB(A) EGO
Hand/arm vibration	: 5.3 m/s ² / 3.9 m/s ² EGO
Working width diameter	: 52 cm - GeoTECH [®] brush
	: 45 cm - Weedee [®] brush
	: 70 cm - Sweeper [®] brush

Battery runtime : 2 x 12Ah batt = 2(*) hours (**)

- EGO Kit also available without batteries and charger

(*) in the case of professional use

(**) Charge cycles: 800 to 1,000 charges (see EGO)

Terrazza Geo TECH[®]

Dry or wet cleaning of nursery groundcovers (ground fabric and weed barrier fabric)

Terrazza Sweeper[®]

Sweeping brush, ideal for removing loose debris

Weedee[®] brush

Removes weeds and moss from surfaces and from between the joints.

For EGO Kit only:

Terrazza-EGO Battery pack

Batteries - 2x12Ah

Terrazza-EGO Super Charger

Charger
Charges 12 Ah in 80 minutes

consumables

Sweeper[®] brush

Weedee[®] brush

Block brush

Terrazza Geotex PRO®: effective and multifunctional

The easy-to-maneuver Terrazza Geotex PRO® brushing machine is ideal for brushing, maintaining and keeping surfaces weed-free, including nursery groundcovers, paved walkways, work areas and driveways.

The brushing machine is unique in its kind due to the significantly reduced brush rotation speed. Weeds, dirt, discoloration (algae or efflorescence) and slipperiness are removed from walkways and nursery groundcovers without the use of high pressure, thermal treatments or (bio)chemical products.

Various brush systems can be mounted on the Geotex PRO® machine:

- The Terrazza Geo TECH® (TGT) for cleaning geotextiles
- The Weedee® weed brush
- The Terrazza Sweeper® brush
- The AXI® brush

1) The combination of synthetic and abrasive bristles in the **Geo TECH® brush** ensures thorough and safe **cleaning of groundcovers**, brushing away loose debris, weeds and even sticky soil from the surface. The loosened debris is collected by the convenient collection hood into a single line on the right side of the machine, where it can then be easily picked up and removed.

2) The **Weedee® weed brush** is used outdoors on all types of **paved surfaces with joints** where **debris and weeds** need to be **removed**, such as driveways, parking lots and storage areas made of concrete pavers or tiles, concrete slabs, asphalt, etc.

3) The **Terrazza Sweeper®** is designed for daily maintenance and the removal of plant debris and spilled potting soil from walkways and work areas.

4) As an additional option, the **AXI® brush (with or without collection tray)** can be used for daily sweeping or for collecting weeds after using the Weedee® weed brush or the Geo TECH® brush.

The Terrazza Geotex PRO® has been specifically developed to meet the needs and requirements of professional nurseries and horticulturists, and is particularly effective for maintaining their infrastructure, both inside and around the business.

Sustainable and eco-friendly maintenance of your business premises

The Geotex PRO® operates **100% ecologically**. No chemicals or detergents are used. Only the brush and, if needed, water do the work. This makes the Geotex PRO® the ideal tool for use around plants, people and animals.

Thanks to the unique concept developed by Terrazza MC®, which combines perfectly controlled vertical pressure, minimal resistance and low rotation speed, **brush wear is minimized**, contributing to the product's durability.

The Geotex PRO® is **highly versatile** thanks to its **simple click system**, which allows the three brushes to be quickly and easily swapped without any tools.

First, there is the **GeoTECH® brush**, specially designed for cleaning container fields covered with ground fabric, without causing any damage to the fabric itself.

Second, the **Weedee® brush** is used to remove weeds and moss from all paths, driveways and terraces made of paving stones, concrete tiles or other hard surfaces in and around the business.

The **Terrazza Sweeper®**, with a diameter of 70 cm, effortlessly brushes away loose debris as well as sticky material from concrete walkways and work areas in no time.

Thanks to the convenient connector click system, **one machine** can easily be used for three different applications, **saving both space and costs** while making work significantly **more efficient**. With the Geotex PRO®, there is no need for three separate machines, one device is enough to handle a wide range of tasks.

The Terrazza Geotex PRO® is a unique concept, specially designed with the patented Terrazza technology, ensuring sustainable and eco-friendly cleaning of geotextiles.

Terrazza Geotex PRO® and its unique advantages

The Geotex PRO® is available in two versions: one equipped with the powerful Honda GVX 160 engine and one with the EGO Power electric motor.

Working with the Geotex PRO® EGO offers double benefits in terms of **ecological footprint**. Thanks to its rechargeable battery, the E-machine produces no emissions and is **CO₂-neutral**. With the addition of the **EGO electric motor** and the use of **Arc Lithium 56V battery technology**, the machine delivers high performance and has a large energy capacity.

Advantages of Terrazza Geotex PRO® Technology

- The Terrazza Geotex PRO® brushes are designed for maximum results at a **lower rotation speed**. This offers the following **advantages**:

- **No projection** of weeds, mud or sharp objects.
- **No spreading of seedlings**.
- **No damage** to surfaces, edges or sprinklers.
- The machine is easy to handle and produces relatively little dust, making it comfortable to use both indoors and outdoors.
- The brushes provide **thorough** cleaning, especially when used with water.
- The **GeoTECH® brush also beautifies the surface and removes slipperiness**.
- **Saves time** in daily cleaning routines and optimizes the safety and appearance of your infrastructure.

- Changing the different brushes on the machine is quick and easy.

- The handle can be **easily folded** (without the use of tools).

- **Compact dimensions**: easy to store and transport.

Advantages of the Terrazza MC® – EGO Collaboration

- The Terrazza Geotex PRO® with EGO electric batteries is compatible with all **professional EGO powertools**.
- The **Arc Lithium 56V battery** delivers the **full power of gasoline, but without noise, hassle or exhaust emissions**.
- **Runtime**: the Geotex PRO® machine is standard equipped with two 12 Ah batteries, providing approximately **2 hours of operation**. This configuration also includes a **fast charger with a rapid charging time of 80 minutes**. There is also a built-in indicator for the remaining runtime.
- **Includes the EGO battery system**: easy to charge and swap.
