

# Terrazza TMC® – The Thoroughly Gentle Cleaner

---

## Advertisement

---

Jürgen Broden runs a landscaping and gardening business in the south of Duisburg. Cleaning of floor surfaces is part of his diverse range of services, with a focus on maintenance work, from coverings to plants.

### Natural Stone Flooring

Wherever the joints are filled with chippings or sand, he no longer has “the trouble of joints coming loose.” When cleaning with the Terrazza TMC® Kit, “the joints are even more firmly compacted than before.” With his device, he now “removes the dirt from both the surface and the joints.” Broden even cleans resin linoleum floors and the impact flooring in an equestrian sports hall with the Terrazza TMC® Kit.

**“The Terrazza TMC Kit really cleans everything,”** says landscaping specialist Jürgen Broden.

## From High Pressure to Brush Power

---

**“Use it purposefully – customers are happy to pay for this quality”**

When it comes to surface cleaning, are high-pressure cleaners always the benchmark?

Broden has not used a high-pressure cleaner for surface cleaning for years: **“You consume huge amounts of water, spray everything around, and often end up cleaning more of the surroundings than the surface itself.”** With the Terrazza TMC® brush machine, it is easier for Jürgen Broden today: **“I leave behind a completely clean construction site.”**

# Surface Remains Protected and Joints Stay Intact

---

With his Terrazza TMC® Kit, Broden cleans coverings ranging from standard paving to natural stone flooring.

**“I don’ t use the device daily. But when I do, it’ s always for targeted jobs. My clients often have special floorings. They want them cleaned as gently as they are thoroughly cleaned. Without effort, without ‘chemicals,’ without secondary contamination caused by using a high-pressure cleaner, without using thermal devices.”**

For heavy soiling, thicker dirt, or weed growth, Broden uses the Terrazza TMC® brush attachment Weedee for pre-cleaning. **“It works like a coarse, powerful street broom, even against moss.”**

## Gentle but Thorough

---

Broden reports a “drawback of high-pressure cleaners” that is rarely considered: damage to the surface of the coverings. At 140 bar water pressure, the surface is “inevitably roughened, which causes dirt to accumulate again more quickly.” He used to clean surfaces that initially required cleaning every few years, but later had to be cleaned annually.

Broden’ s cleaning capacity is about 400 m<sup>2</sup> per day, “full throttle and with an assistant” sometimes up to 600 m<sup>2</sup>.

**“The TMC Kit is designed for cleaning small to medium-sized surfaces, such as high-quality terraces,”** says the landscaping specialist. **“When the machine is delivered, a thorough introduction is provided to quickly understand how to operate it.”**
