

The Terrazza Omni[®] PRO Kit consists of :

Machine Omni PRO[®] - Petrol engine / Electric engine

Power : 4,5 kW/ 3,5 kW EGO
 Engine type : Honda GXV petrol engine/ EGO PU2700
 Rotation speed : +- < 200 rt/min
 Weight : 79 kg
 Dimensions : 160cm x 80cm x 73cm
 Sound pressure level dB(A) : 88 dB(A) / 74 dB(A) EGO
 Hand/arm vibration ahwd : 5.3 m/s² / 3.9 m/s² EGO
 Working width diameter : 52 cm - OmniBrush[®]

: 45 cm - Weedee[®] brush
 : 70 cm - Sweeper[®] brush

Battery autonomy : 2 x 12Ah batt = 2(*) hours (**)

• EGO Kit also available without batteries and charger

(*) in case of professional use

(**) Charging cycles: 800 to 1000 charging cycles (see EGO)

Only for EGO Kit:

Terrazza-EGO Batteries
2 pack 2x 12Ah

Terrazza-EGO Super charger
Charger - 2 pack
Charges 12 Ah in +- 90min

Terrazza OmniBrush[®]
1 single brush for indoor and outdoor cleaning.

Terrazza Sweeper[®]
Sweeping brush, ideal for brushing loose dirt.

Weedee[®] weed brush
Removes weeds and mosses from the surface and from between joints.

Terrazza XL[®]
Block element to clean any kind of pavement.

Consumables

Terrazza XL[®]

Geotex XL[®]

Terrazza Weedee[®]

Terrazza Sweeper[®]

HONDA
The Power of Dreams

Terrazza Omni PRO®: Cleaning and maintenance of the entire infrastructure, both indoors and outdoors, thanks to the OmniBrush®.

The Terrazza Omni PRO® is a multifunctional brush machine, ideal for brushing, maintaining, and keeping container fields, paved walkways, work floors, and driveways of garden centers and nurseries weed-free.

The specially developed OmniBrush® is part of the unique and globally patented Terrazza MC® concept, which is based on a system of a mother brush with interchangeable brush elements.

Thanks to the system of interchangeable brush elements, the OmniBrush® can be adapted to the type of surface that needs to be cleaned.

Depending on the type of surface to be cleaned, there is a choice between two types of brush elements:

1. The **Geotex XL® brush** elements are designed for cleaning container fields covered with ground cloth. Thanks to the special composition of the brush element, loose dirt, weeds, soil, algae, and even slipperiness can be removed without damaging the ground cloth. The ground cloth can “breathe” again and looks as good as new.
2. The **Terrazza XL® brush** elements, on the other hand, are designed for cleaning any type of paving. Wood, concrete, asphalt, bricks, natural stone, ceramic tiles, and cobblestones hold no secrets for the Terrazza XL® brush elements. Paved walkways, exhibition spaces both indoors and outdoors; work floors, driveways, and parking lots can easily be cleaned or maintained with the OmniBrush®.

The brush elements can be quickly and easily swapped using the supplied M6 key and are also adjustable in height by inserting spacers.

Thanks to the OmniBrush®, the Omni PRO® is always and everywhere deployable!

Sustainable and ecological maintenance of container fields and various types of hard surfaces with the Omni PRO® KIT.

When brushing with the Geo TECH® brush on ground cloth with the Omni PRO® machine, **no chemicals are used.**

All this makes the **OMNI PRO®** the most **ecological and ideal tool to use in the environment of plants, humans and animals.**

Thanks to the unique concept developed by Terrazza MC® of the combination of perfectly **controlled vertical pressure, minimal resistance** and the **low rotation speed**, the wear of the ground cloth is **reduced** to a minimum, which in turn contributes to the durability of the product.

Various brush systems can be mounted on the Omni PRO® kit using a convenient “click” system with connectors:

1. Thanks to the **OmniBrush®**, both ground cloth (with the Geotex XL® brush elements) and various types of hard surfaces can be cleaned with just water.
2. The Terrazza **Sweeper®** is a sweeping brush with a working width of 70 cm that can quickly sweep any type of surface.
3. The Terrazza **Weedee®** weed brush is suitable for removing heavy weeds from paths, parking lots, and driveways, allowing for quick cleaning afterward with the OmniBrush® equipped with Terrazza XL® brush elements.
4. As an optional extra, the **AXI® roller brush** (with or without a collection bin) can be added for daily sweeping.

The Terrazza Omni PRO® is a unique concept, specially designed with Terrazza technology that stands for sustainable and ecological cleaning. It is a multi-purpose brush machine, ideal for brushing, maintaining and keeping weed-free both container fields, paved aisles, work floor and driveways of garden centres and nurseries.

The Omni PRO® is multifunctional thanks to its interchangeable brushes that can be used on different types of surfaces and pavements.

Unique and effective: the Terrazza Omni PRO®.

The Omni PRO® is available in 2 versions: one equipped with the powerful **Honda GXV 160 engine** and one with the **EGO Power electric motor**.

Working with the OMNI PRO® EGO **delivers double benefits** in terms of its **environmental footprint**. Thanks to the rechargeable battery, the E-machine produces zero emissions and is **CO2 neutral**. With the addition of the **EGO electric motor** and the use of **Arc Lithium 56V battery technology**, the machine delivers high performance and has a high energy capacity.

Benefits of Terrazza Omni PRO® technology

- The Terrazza Omni PRO® brushes are designed for maximum results at **lower rotation speeds**. This offers the following **advantages**:

- **No projection** of weeds, mud, or sharp objects.
- **No spreading of seedlings.**
- **No damage** to the surface, edges, or sprinklers.
- The machine is easy to handle and produces relatively little dust, making it comfortable to work with, both indoors and outdoors.
- The brushes **clean thoroughly**, especially when used with water.
- The Geo TECH® brush also **beautifies the surface and removes slipperiness.**
- **Saves time** in the daily cleaning routine and optimizes the safety and image of your infrastructure.

- Changing the different brushes on the device is easy and smooth.

- The handle **folds up** simply (without the use of tools).

- **Compact dimensions**: easy to store or transport.

Benefits of the Terrazza MC® - EGO Collaboration:

- **The Terrazza Omni PRO® with EGO electric batteries is compatible with all professional handheld tools from EGO powertools.** (Note: The Omni PRO® machine can be delivered with or without the batteries)
- **The Arc Lithium 56V battery** delivers all the power of gasoline, but **without the noise, fuss, or exhaust gases.**
- **Runtime:** The Omni PRO® machine is standard equipped with **two, 12 Ah batteries that provide a runtime of approximately *2 hours**. This configuration also comes with a fast charger that has a super-fast charging time of 80 minutes. There is also a built-in indicator for remaining runtime.
- **Includes EGO battery system:** easy charging and swapping.
