

The Terrazza Greeny PRO® Kit consists of:

1. Terrazza Greeny PRO® Short Version / Greeny PRO® Long Version:

|                           |                                                          |
|---------------------------|----------------------------------------------------------|
| Power                     | : 18V DC - 5.2 Ah or 10Ah / 18V DC - 5.2 Ah or 10Ah      |
| Brush diameter            | : 260 mm / 260 mm                                        |
| Velcro pad diameter       | : 350mm / 350 mm                                         |
| Rotation speed            | : 65-250 rpm / 65-250 rpm                                |
| Weight (without brush)    | : 2.7kg / 5.4 kg                                         |
| Battery specifications    | : Standard CAS battery / Standard CAS battery (wearable) |
| Terrazza battery versions | : 18V DV -5.2 Ah ( Li-ion) / 18V DC -5.2 Ah ( Li-ion)    |
|                           | : 18V DC- 10.0 Ah ( LiHD) / 18V DC- 10.0 Ah ( LiHD)      |
| Terrazza battery charger  | : ASC 55 / ASC 55                                        |
| Machine length            | : 1135mm / 2000mm                                        |
| Machine head              | : Fixed / Adjustable                                     |

2. Velcro pad with additional sponge

3. Greeny PRO® machine  
Left: Short version  
Rechts: Long (extendable) version

2x

6. Battery 5.2 Ah

1x

5. Charger

1x

4. Terrazza Greeny® brush with 3 sets of brushes: Standard, stepped and stainless steel

Terrazza Greeny PRO® options:

Battery 5.2 Ah  
Battery 10 Ah

Charger ASC55

Greeny standard block brush

Greeny abrasive block brush

Greeny block brush with stainless steel

Greeny stepped block brush

# Terrazza Greeny PRO®

ECO CLEANER FOR NURSERIES AND GARDEN CENTRES

## Terrazza MC®

Innovators in **green**  
**cleaning** technology

## Terrazza Greeny PRO®: Clean your growing tables without damaging the surface.

**Terrazza Greeny PRO®: The ultimate solution for a clean and well-maintained nursery environment.**

The innovative Greeny® brush makes the Terrazza Greeny PRO® the ideal machine for **cleaning and removing moss, dirt and weeds from all types of growing tables**—whether covered with woven or non-woven anti-root fabric—as well as **aisles, walkways and work areas**.

The Terrazza Greeny PRO® is equipped with an **electric motor** that allows for an adjustable brush rotation speed. This unique feature effectively removes **weeds, dirt, discolouration—including algae and salt deposits—and slippery substances from anti-root fabric, aisles and work areas**.

Importantly, cleaning and weed removal with the Greeny PRO® are completely **chemical-free**, significantly reducing the environmental impact while eliminating the need for high-pressure or thermal treatments.

The Greeny® brush, made from a **blend of synthetic and abrasive fibres**, provides thorough and safe cleaning of all geotextiles. Thanks to its dual-fibre design, it easily removes weeds, dirt, mud and sticky materials, helping to maintain a clean environment.

The Greeny PRO® features an **adjustable rotation speed**, allowing users to adapt the settings to their specific needs. The lower speed setting is particularly effective for uneven or challenging surfaces, providing improved stability and precision. In contrast, the higher speed setting delivers optimal performance for thorough cleaning across a variety of surfaces.

**The Terrazza Greeny PRO® has been specially developed to meet the needs of nurseries and garden centres and is the ideal solution for maintaining both indoor and outdoor infrastructure. Keep your growing tables, workspaces and surfaces looking clean and fresh!**

## Sustainable and ecological maintenance of your infrastructure

**Greeny PRO®: A versatile cleaning solution for growing tables and platforms**

The Greeny PRO® enables efficient cleaning of **all types of growing tables and platforms, both with and without geotextile covering**. Depending on the type of surface and level of soiling, cleaning can be carried out **with or without water**, providing flexibility for a wide range of cleaning applications.

Terrazza MC features a unique concept that combines perfectly controlled vertical pressure, minimal resistance and a reduced rotation speed. Cleaning with the Greeny PRO® is a completely **chemical-free process**, making it **the ideal solution for use around plants and people**.

Thanks to the synergy between reduced rotation speed and resistance to vertical pressure, the Greeny® brush effectively removes weeds and moss **from both surfaces and joints**. Aisles, work areas, terraces and walls—whether made of concrete or tiles—will be clean and well maintained **in no time**. The long synthetic fibres of the patented Terrazza brush penetrate deep into the joints, delivering immediate and long-lasting results.

The Terrazza Greeny® brush is specifically designed for deep cleaning geotextiles and other technical surfaces on growing tables and supports. The operator can quickly clean surfaces of any size, large or small, without extensive preparation. The machine's minimal side projection allows for effective cleaning even in busy environments, such as when customers or colleagues are nearby.

**Versatile cleaning of various types of structures is possible, including walls, steps, doors and transport trolleys. Experience the unmatched versatility and efficiency of the Greeny PRO® for all your cleaning needs in the nursery.**

## Unique & Efficient: The Terrazza Greeny PRO®

Thanks to its optimised weight distribution and well-balanced handlebar, the machine is **extremely manoeuvrable**.

The brush rotates at a **lower speed**, offering the following **advantages**:

- **No projection** of weeds, mud or sharp objects.
- Prevents the spread of seedlings.
- **No damage** to the surface, edges or sprinklers.
- Relatively little dust, making it **comfortable** to work with both indoors and outdoors.
- The brush **cleans thoroughly**, especially when used with water.
- The Greeny® brush leaves the surface clean and even while reducing slipperiness.
- **Saves time** during daily cleaning routines.

### Additional benefits:

- Supplied with an additional Velcro pad, allowing the use of different types of cleaning pads for **extra cleaning applications (e.g. glass, plastics and metals)**.
- **Compact dimensions** make storage and transport easy.
- The machine comes with a **convenient carrying case for easy mobility**.
- **The long version** of the Greeny PRO® features an **extendable handle and an adjustable head**.
