

Choose the drive system that suits your work

Honda petrol • EGO electric • STIHL electric

Motor: Honda GXV
Motor type: Petrol

Power: 4,5 kW
Weight: 14 kg
Hand/arm vibration: 5,3 m/s²

Motor: EGO PU2700
Motor type: Electric • 56V

Power: 3,5 kW
Weight: 11,8 kg
Hand/arm vibration: 3,9 m/s²

Motor: STIHL Powerhead
Motor type: Electric • 72V

Power: 3 kW
Weight: 11,5 kg
Hand/arm vibration: 3,9 m/s²

Machine Geotex PRO®

Rotational speed : +- < 200 rpm
Weight : 79 kg
Dimensions : 160cm x 80cm x 73cm
Working width : 52 cm - GeoTECH® brush
: 45 cm - Weedee® brush
: 70 cm - Sweeper® brush

Terrazza Sweeper®

Sweeper brush, ideal for removing loose dirt and debris.

Weedee® brush

Removes weeds and moss from surfaces and between joints.

Terrazza Geo TECH®

Dry or wet cleaning of geotextiles. (ground cloth and anti-root cloth)

Consumables

Sweeper® brush

Weedee® brush

Block brush for geotextiles

Terrazza Geotex PRO®: Effective and Multifunctional

The easily manoeuvrable Terrazza Geotex PRO® brush machine is ideal for brushing, maintaining and keeping weed-free growing surfaces covered with ground cloth or anti-root cloth, paved pathways, work areas and driveways.

The machine stands out thanks to its significantly reduced brush rotation speed. Weeds, dirt, discolouration (algae or mineral deposits) and slippery surfaces are removed without the use of high pressure, thermal treatments or (bio)chemical products.

The Geotex PRO® machine can be equipped with different brush systems:

- Terrazza Geo TECH® (TGT) for cleaning geotextiles
- Weedee® weed brush
- Terrazza Sweeper® sweeping brush
- AXI® brush

1) The combination of synthetic and abrasive bristles in the **Geo TECH® brush** ensures thorough and safe **cleaning of anti-root cloths**. Loose dirt, weeds and even sticky soil are brushed away from the surface. The loosened debris is gathered into a single line on the right side of the machine by the practical collection hood, making it easy to collect and remove.

2) The **Weedee® weed brush** is used outdoors on **all types of paved surfaces with joints** where **dirt and weeds need to be removed**, such as driveways, parking and storage areas made of concrete pavers or tiles, concrete slabs, asphalt, etc.

3) The **Terrazza Sweeper®** is designed for daily maintenance and for removing plant debris and spilled potting soil from pathways and work areas.

4) As an additional option, the **AXI® brush (with or without collection tray)** can be used for daily sweeping or to collect weeds after using the Weedee® weed brush or Geo TECH® brush.

The Terrazza Geotex PRO® has been specially developed to meet the needs and requirements of professional growers and horticulturists. It is particularly effective for maintaining their infrastructure, both inside and around the business.

Sustainable and ecological maintenance of your business premises

The Geotex PRO® works **100% ecologically**. **No chemicals or detergents are used**, only the brush and, if necessary, water do their work. This makes the Geotex PRO® the **ideal tool to use around plants, people and animals**.

Thanks to the unique concept developed by Terrazza MC® of combining perfectly controlled vertical pressure, minimal resistance and a low rotation speed, **brush wear is reduced to a minimum**, which contributes to the durability of the product.

The Geotex PRO® is particularly **multifunctional** thanks to the **simple click system** with which the 3 brushes can be changed quickly and without tools.

On the one hand, there is the **GeoTECH® brush**, specially designed for cleaning growing areas covered with ground cloth, without causing damage to the ground cloth itself.

On the other hand, there is **the Weedee® brush** for making all paths, driveways and terraces with concrete pavers, concrete tiles or other paved surfaces around and within the company free of weeds and moss.

The **Terrazza Sweeper®**, with its 70 cm diameter, effortlessly brushes away all loose dirt, as well as sticky material from concrete pathways and work areas, in no time.

Thanks to the convenient connector click system, **one machine** can be effortlessly used for three different applications, which not only **saves space and costs**, but also makes the work much **more efficient**. With the Geotex PRO®, you therefore no longer need three separate machines. One machine is enough to handle all kinds of jobs.

The Terrazza Geotex PRO® is a unique concept, specially designed with the patented Terrazza technology that stands for sustainable and ecological cleaning of geotextiles.

Terrazza Geotex PRO® and its unique advantages

The Geotex PRO® is available in three versions: a version equipped with the powerful Honda GXV 160 engine, a version with the EGO PU2700 electric motor and a version with the STIHL Powerhead 72V electric motor.

The electric versions combine a lower ecological footprint with strong performance. The EGO version operates on the Arc Lithium 56V platform; the STIHL version on the 72V platform. The operation and the low brush rotation speed ($\pm < 200$ rpm) are the same for all versions.

Advantages of the Terrazza Geotex PRO® technology

- The Terrazza Geotex PRO® brushes are designed for maximum results at a **lower rotation speed**. This offers the following **advantages**:

- **No projection** of weeds, mud or sharp objects.
- **No spread of seedlings**.
- **No damage** to the surface, edges or sprinklers.
- The brushes clean thoroughly, especially when using water.
- **The GeoTECH® brush also makes the surface look clean and removes slipperiness**.
- **Saves time** in the daily cleaning routine and optimises the safety and image of your infrastructure.

- The different brushes **can be changed easily and smoothly**.

- The handle **can be folded** easily (without the use of tools).

- **Compact dimensions**: easy to store or transport.

Electric motor versions

The EGO PU2700 delivers 3.5 kW on the Arc Lithium 56V platform. **EGO batteries are compatible with professional EGO Power+ hand tools**. The standard configuration with two 12 Ah batteries offers approximately two hours of operating time, a fast charger and an indicator for the remaining operating time.

The STIHL Powerhead 72V delivers 3 kW on a 72V platform. **This version also has the same low rotation speed as the other models and offers a quiet, emission-free option for professional weed management**.

Both battery versions are easy to charge and the batteries can be changed quickly.
