

The Terrazza Weedee® PRO Kit consists of:

Weedee PRO® Machine – Gasoline Engine / Electric Motor

Power	: 4,5 kW / 3,5 kW
Engine type	: Honda GXV gasoline engine / EGO PU2700
Rotation speed	: +- < 200 rt/min
Weight	: 79 kg
Dimensions	: 160cm x 80cm x 73cm
Sound pressure level dB(A)	: 88 dB(A) / 74 dB(A) EGO
Hand/arm vibration	: 5.3 m/s ² / 3.9 m/s ² EGO
Working width diameter	: 45 cm - Weedee® brush
	: 70 cm - TWT® brush
Battery life	: 2 x 12Ah batt = 2(*) hours (**)

- EGO Kit also available without batteries and charger

(*) In case of professional use

(**) Charge cycles: 800 to 1000 charges (see EGO)

1x

Weedee® weed brush

Removes weeds and moss from the surface and from between the joints.

1x

Terrazza Wire TECH® (TWT) brush

Removes tall weeds from large paved surfaces.

For EGO Kit only:

Terrazza-EGO Batteries
2 pack 2 x 12Ah

Terrazza-EGO Super charger
Charger
Charges 12 Ah in 90 minutes

Consumables Weedee PRO® Kit

AXI® sweeper brush with collection tray (optional)

Weedee® weed brush

Bundle of braided metal tufts

Bundle of synthetic tufts

Protective cap

Consumables Terrazza Wire TECH®

Terrazza Weedee PRO®: thorough and efficient weed removal with the Weedee® and the Terrazza Wire TECH® brush

The **Terrazza Weedee PRO®** is unique in its kind due to the **significantly reduced rotation speed** of its brushes. With the **easily maneuverable** Weedee PRO®, weeds and moss can be removed from paved surfaces without the use of chemicals, high pressure or thermal treatment.

Depending on the type of work, different brushes can be mounted on the Weedee PRO® machine.
Multifunctionality at its best!

The **Weedee® brush** removes weeds from the surface and from between the joints and can be quickly and easily used for interim surface treatments.

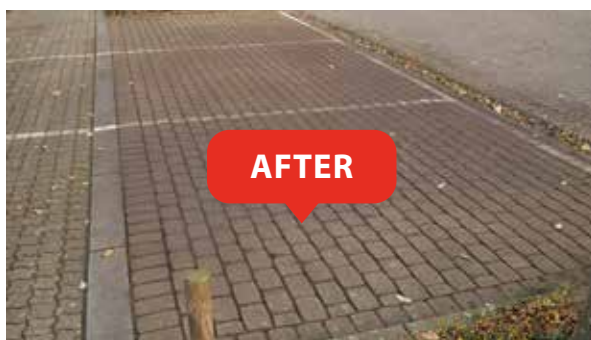

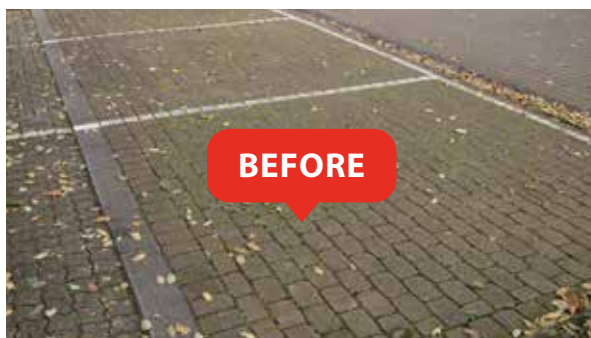

The **Terrazza Wire TECH® brush (TWT)**, with a working width of 70 cm, is ideal for heavily soiled surfaces. Its synthetic tufts and braided steel tufts remove tall and dense weeds from the surface and can be replaced when heavily worn.

For **sweeping**, whether for daily cleaning or for collecting the removed weeds, the **AXI® sweeping brush** can also be mounted on the Weedee PRO® machine. The AXI® brush, with or without a collection container, is optionally available in the Weedee PRO® kit.

Each brush is equipped with a connector that makes changing brushes smooth and effortless.

The Terrazza Weedee PRO® can be used on **all kinds of surfaces**: terraces, driveways, parking lots, sidewalks, etc. made of pavers, concrete, cobblestones, brick, asphalt and more.

The Terrazza Weedee PRO® has been specially developed to meet the needs and requirements of professional contractors, landscapers and municipalities.

Sustainable and ecological weed removal

When removing weeds with the Weedee PRO® machine, **no chemicals or detergents** are used. This makes the Weedee PRO® **the most ecological and ideal tool to use around plants, people and animals.**

Thanks to the unique concept developed by Terrazza MC® — combining perfectly controlled vertical pressure, minimal resistance and low rotation speed — **brush wear is reduced to a minimum**, contributing to the product's durability.

The Weedee PRO® is highly **multifunctional** thanks to its simple click system, which allows the two brushes to be quickly exchanged without the need for tools. This means that a **single machine** can be effortlessly used for two different applications, **saving both space and costs** while making the work much more **efficient**. With the Weedee PRO®, you no longer need two separate machines, one device is all it takes to get both jobs done.

The Weedee PRO® is available with an EGO motor, an electric engine. This gives the Weedee PRO® EGO a double advantage in terms of ecological footprint: it produces **no exhaust emissions** and operates at a significantly **lower noise level**. This makes working not only **more environmentally friendly**, but also more pleasant for both the user and the surroundings.

The Weedee PRO® has been designed with a focus on **user comfort and efficiency**. The ergonomic, height-adjustable handlebar and well-balanced weight distribution **reduce strain**, while the low-vibration construction minimizes hand and arm fatigue. This allows the user to **work comfortably for extended periods**, even during intensive tasks.

The Terrazza Weedee PRO® is a unique concept, developed with patented Terrazza technology that guarantees sustainable and ecological weed removal.

Using the Terrazza Weedee PRO® comes with nothing but benefits.

The Weedee PRO® is available in 2 versions: one equipped with the powerful Honda GVX 160 engine and one with the EGO Power electric motor.

Working with the **Weedee PRO® EGO** offers **double benefits** in terms of **ecological footprint**. Thanks to its rechargeable battery, the electric machine produces no emissions and is CO₂-neutral. With the addition of the **EGO electric motor** and the use of **Arc Lithium 56V battery technology**, the machine delivers high performance and has a large energy reserve.

Advantages of Terrazza Weedee PRO® Technology

- The brushes of the Terrazza Weedee PRO® are designed for maximum results at **low rotation speeds**, offering the following **advantages**:

- **No splashing** of weeds, mud or sharp objects.
- **Removes weeds and a large part of the roots.**
- **No damage** to surfaces, curbs, walls, signposts, lampposts, etc.
- Easy to handle and produces relatively little dust, making work comfortable both indoors and outdoors.
- **Saves time** on daily cleaning and improves the safety and appearance of your infrastructure.

- **Changing** the different **brushes** on the machine is **simple and smooth**.

- The push handle can be folded without tools.

- **Compact dimensions**: easy to store or transport.

Benefits of the Terrazza MC®-EGO collaboration

- **The Terrazza Weedee PRO®** with EGO electric batteries is **compatible** with all professional **hand tools from EGO Power Tools**.
- **The Arc Lithium 56V battery** delivers **all the power of petrol, but without the noise, hassle or exhaust emissions**.
- **Operating time**: The Weedee PRO® machine comes standard with **two 12 Ah batteries**, providing an operating time of approximately **2 hours**. This configuration also includes a **fast charger with a super quick charging time of 80 minutes**. A built-in indicator shows the remaining operating time.
- **Includes EGO battery system**: easy to charge and swap.
