DID YOU KNOW? Child pornography and artificial intelligence, part 2 Artificial intelligence, or AI, has opened the door to generating incredibly realistic images. Often called "deepfakes," we have seen these images crop up on social media. In January 2024, explicit images of Taylor Swift, created by AI, were posted online, and viewed over 45 million times before they were removed. In the same way, AI technology can be used by child abusers to create and share explicit imagery. For more information, read the VIRTUS® article "Artificial Intelligence - Deepfakes and Child Abusers" on lacatholics.org/did-you-know/.
