**OBJECT: Substance Management Policy**

Dear Customer,

our company establishes basic principles for chemical substance management in order to:

- improve awareness of the impact of the chemicals used on health and the environment;
- fully understand the risks associated with chemicals in relation to both the environment and the health of workers and stakeholders;
- safeguard the environment and ecosystems while also preserving human health accordingly.

To implement the previously expressed principles, the company is committed to its Customers to:

- provide products that are safe and healthy for society and the environment in accordance with current Regulations;
- provide customers with all information about the chemicals in our products in a timely manner (sending MSDS, TDS when available and dedicated assistance);
- identify chemical hazards in order to reduce or limit them as much as possible;
- keep up-to-date the evaluation of technical and economic aspects of existing and newly introduced chemicals as well as aspects concerning safety and environment in the light of new discoveries made;
- comply for its products with the limits stipulated by MRSL ZDHC as published on the [mrsl.roadmaptozero.com](http://mrsl.roadmaptozero.com) platform;
- prevent possible injuries or illnesses to workers when handling chemicals by providing dedicated technical assistance and indicating the appropriate PPE (Personal Protective Equipment) to be used when using the products;
- use chemicals as efficiently as possible, to minimize the quantities used;
- develop alternative technologies to try to replace substances that are hazardous to the environment and workers' health;
- design new items from the perspective of risk reduction, choosing chemicals that ensure workers' health and environmental protection.
