**Subject:** Re: test - BESS decision

Thank you Charlene, for helping me out with this.

Dear Charlene and Council

The time has come for a decision. I know you have all done due diligence to learn what BESS is all about and I'm sure all of you have more understanding of what is involved than I do. I know that all of you have been in Amour Township for many years if not having been born and raised here. I trust that none of you would do something that would endanger our beautiful Amour.

I have spent just about every summer of my life at my Grandma Stickland's home on Leggetts Road before moving up here in 1997.

From what I have read about BESS and stories of the danger a fire threatens us with, I really do not think we want this to happen near our homes. As far as I understand it really does not offer us anything substantial to Amour's well being. But it does threaten the air we breathe, the ground we walk on and most importantly our water system, rivers and lakes. The amount of contamination that the Magnetawan River can spread is unbelievable. It reaches Lake Ontario and beyond.

I truly believe that all of you are of the same mind as me. We love Amour and would not do anything that would endanger it or our lives here. I have thought right from the start that there is no way any of you would subject Amour Township to this imminent danger. I sure hope my faith and trust in you all is not misplaced.

Your's Faithfully

Sandra Anderson

I want to be counted as being totally opposed to this storage plan. Burk's Falls is NOT the appropriate location for this purpose.
