THE BP-SERIES AUGER

THE NEW BP-SERIES PLANETARY REDUCTION AUGER DRIVES BRING NEW ELEMENTS OF PERFORMANCE AND DEPENDABILITY TO THE ATTACHMENT MARKETPLACE.

The BP-Series auger drives deliver strength where it counts. Reliable. Proven. Ready when you are.

- An estimated 20% increase in gear strength over previous LOWE models and far more strength than the competition.
- A through hardened alloy drive shaft with unbreakable performance.
- An even stronger shaft bearing support than previous models.
- A high grade shaft seal with increased durability over competitors.
- A zero leak motor mount.
- A new design attachment fastening system with superior strength and durability.

THE TJ-100

NEW TJ-100 GEAR REDUCTION AUGER DRIVE UNIT
WITH INNOVATIVE NEW MOUNTING SYSTEM

Power meets precision with the new TJ-100 Gear Reduction Auger Drive Unit. Upgraded mounting. Proven strength.

- Featuring a LOWE® designed and manufactured gearbox. Made in the USA.
- Choose either a 2 inch (51mm) hex shaft or a 2 9/16 inch (65mm) round shaft.
- For Mini-Loaders with Toro-Dingo* compatible mountings and other brands of smaller machinery.
- Use augers up to a 36 inch diameter (914mm) depending upon conditions.
- Innovative new high lift mounting has better carrying stability and allows use of four foot (1.3m) long augers.
- Backed by a five-year repair or replace warranty on the gearbox.
- Unit has fully protected hydraulic hoses.

#WorkYourWay #AttachmentOptions #BuiltByBerlon

Customize your attachment with Berlon's range of Conus Tines. Be sure to keep them tight —485 to 500 ft./lbs.—to help prevent breakage near the nut.

- 4-sided tapered tine design enables tines to slip into and retract from dense bales easily
- Small end of sleeve is counter-sunk for nut
