

# Touchpoint Billing Features

Touchpoint billing is a billing platform that integrates with all the most popular Telco, PSA and Cloud Platforms to automate your billing run and reduce your billing leakage.

## We enhance your biggest customer touchpoint. **Your Bill.**

We are a billing platform for Managed Service Providers to allow simple, monthly billing of all your services to your client on a single bill.

### Consumption Based Billing

Touchpoint Billing allow you to bill all your IT and Telco usage based services on a single bill.

### Single Bill for clients

Stop sending your customers multiple invoices every month. Do it all on a single bill from Touchpoint Billing

### Spot Billing Leakage

Do you know how many AV endpoint licenses you are paying for VS how many you are billing for? Touchpoint Billing does.

### Show Your True Value

Stop your customers questioning your true value. Show them with visual representations of costings from different revenue streams.

### Dynamic Advertising

With multiple payment options such as credit cards and electronic transfers clearly marked. We help you get paid faster.

### Sell the White-Space

Touchpoint Visually represents the white-space within your existing customer mix so you can focus on selling the low hanging fruit first.

### Client Portal

Touchpoint Visually represents the white-space within your existing customer mix so you can focus on selling the low hanging fruit first.

### Powerful Integrations

We integrate with all leading cloud and telco platforms to bring all your data to one place. Speak to us about a custom integration today.

## Let's Work Together!

Automated billing for modern business, improve billing accuracy and concentrate on other important aspects of running your business.
