

Dynamic Planner

For Planners, Schedulers & Shop Floor Leaders
NetSuite Native | Built by Manufacturing Experts

WHAT IT DOES

Dynamic Planner brings true finite scheduling into NetSuite. Schedule against real work center capacity and material constraints, see load at a glance with color coded heat maps, and drag and drop jobs right on the calendar. Run what if scenarios before you commit, spot bottlenecks before they hit the floor, and keep promises without exporting to Excel.

Key Features

LIVE CAPACITY

- Work center heat maps
- Rough cut capacity
- Extended shift planning
- Skill & tooling limits

WHAT IF MODE

- Safe simulations
- Review before commit
- Drag and drop scheduling
- Drill to source WO

AUTO OPTIMIZE

- Work order sequencing
- Changeover optimization
- Reduced setup time
- Downtime & KPI tracking

BEST FIT

- Job shops
- Custom fabrication
- Discrete manufacturing
- ETO & project shops

WHY IT WINS

- NetSuite native build
- Capable to promise
- No third party tools
