

## **Environmental Engineer (10 yrs)**

Franklin Engineering Group, Inc.

381 Riverside Dr. Suite 200

Franklin, TN 37064

[www.franklinengineering.com](http://www.franklinengineering.com)

### **About Franklin:**

Franklin Engineering Group, Inc. is a multi-disciplinary design and consulting engineering, and environmental firm founded in 1998 and located in the Nashville, TN area. Franklin Engineering specializes in industrial, specialty material handling, environmental design, and sustainability. We believe that industry experience and the application of technical knowledge and analytical problem-solving result in practical solutions that maximize the potential for successful projects. Our senior staff averages over 20 years design experience.

### **About the Position:**

The Environmental Engineer will work in a project-driven environment supporting air and waste permitting efforts in air emissions testing, risk assessment, and industrial compliance. The successful candidate will have responsibilities that include implementation of regulatory requirements, and developing sustainable practices and solutions, under supervision. Experience with environmental permitting, report writing, calculations, compliance and site assessment preferred. The Environmental Engineer will interact with project team members, clients, contractors and vendors during the execution of projects.

### **Responsibilities:**

- Reading and processing regulatory information to assist clients in compliance activities at industrial facilities
- Utilizing Excel and other tools to perform calculations
- Participating in on-site testing to support permitting and risk assessment activities
- Providing project support for a variety of environmentally driven tasks at our service-based consulting firm

### **Essential Qualifications:**

- BS Chemical Engineering, Environmental Engineering, Environmental Science, Chemistry or related degree
- Coursework/experience in air and waste regulatory compliance, materials management, and sustainability
- 10 years' experience in regulatory, consulting, or industrial compliance
- Strong technical writing and communication skills
- Detail oriented and expertise in Microsoft Excel
- Travel required < 20%

### **Preferred Experience:**

- Title V and minor source air permitting in TN, KY and beyond
- Air dispersion modeling support

**We are an equal opportunity employer.**
