

Health and Safety Policy Statement

Access All Areas genuinely believes that people constitute the most valuable part of any Company and accordingly, all possible steps will be taken to ensure a safe and healthy environment for employees, subcontractors and all other persons involved in the Company's operations.

Access All Areas further believes that providing safe, healthy working conditions, as well as protecting the environment are part of good management practice. Application of these principles improve business results by reducing injuries, ill-health losses and liabilities, while at the same time raising morale which in turn raises productivity.

The Company considers that improvement of the working environment is an on-going process, and that legal and statutory requirements define a minimum level of achievement. The company will at all times comply with local statutory requirements, relevant safety legislation, regulation, continual improvement and prevention of pollution.

The Company believes and implements the philosophy of IRATA (Industrial rope access trade association) and in doing so strictly adheres to the guidelines and requirements as laid down by that association.

Access All Areas management and similarly, employees have a responsibility as well as statutory obligations to collaborate on all safety matters, exert self-discipline, maintain safety awareness and prevent injury to themselves or others.

The Company will ensure that appropriate safety information is sourced, communicated and made readily available as and where required.

The monitoring of safety performance and the evaluation of Safety Policy will always be an on-going process.
