

RHINOPUMPS

It starts by simplifying
the work and **making**
accountability clear.

Less risk. More clarity. Better results.

STAK™

By assigning clear
ownership **instead of**
managing handoffs.

Handoffs create gaps.
Gaps create failures.

STAK[™]

Ownership is built in. Not assigned afterward.

RhinoSTAK™ integrates pumps, controls, and supporting equipment into a single packaged system.

One partner from design to startup

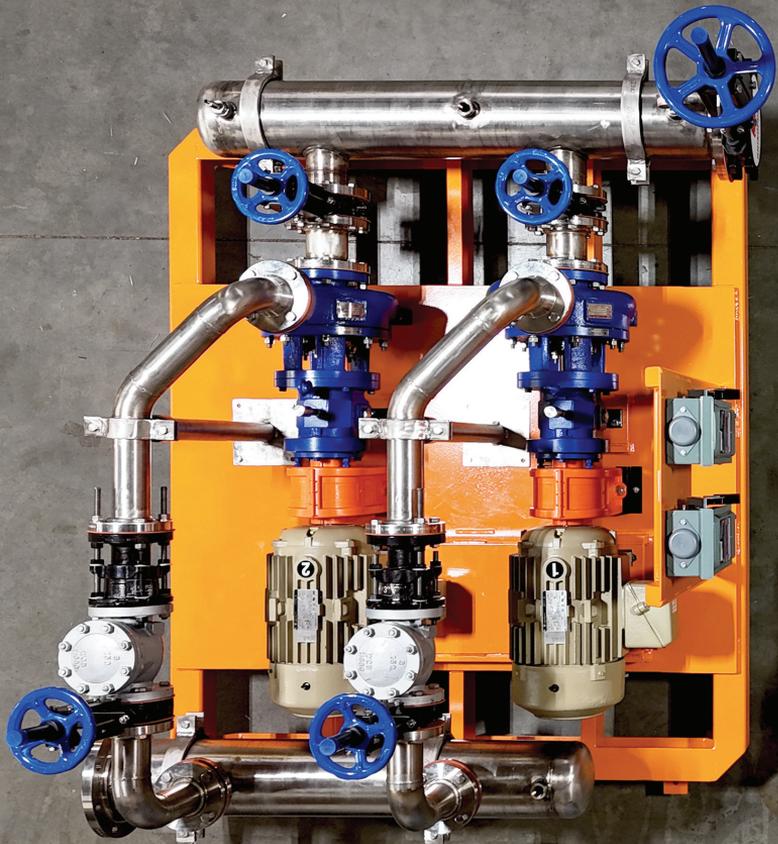

Pre engineered & factory tested

Clear system ownership from design through startup

Simplified installation & coordination

Wastewater systems **do not** require a wet well.

OverWatch® is a RhinoSTAK™ based wastewater pump system designed to reduce maintenance risk and simplify service.

Reduces exposure to H₂S gas
& confined space hazards

Passes wipes &
rags easily

Enables emergency repairs
without entering the wet well

Stops clogs with a dry,
inline pumping design

The same approach. **Applied everywhere.**
